Schémas complets — TOGAF Part 1

Notions fondamentales + blocs ADM

Contenu

- 20 notions clés
- 1 vue d’ensemble de l’ADM
- 6 pages sur les blocs / phases
- Support visuel de révision

Mode d’emploi

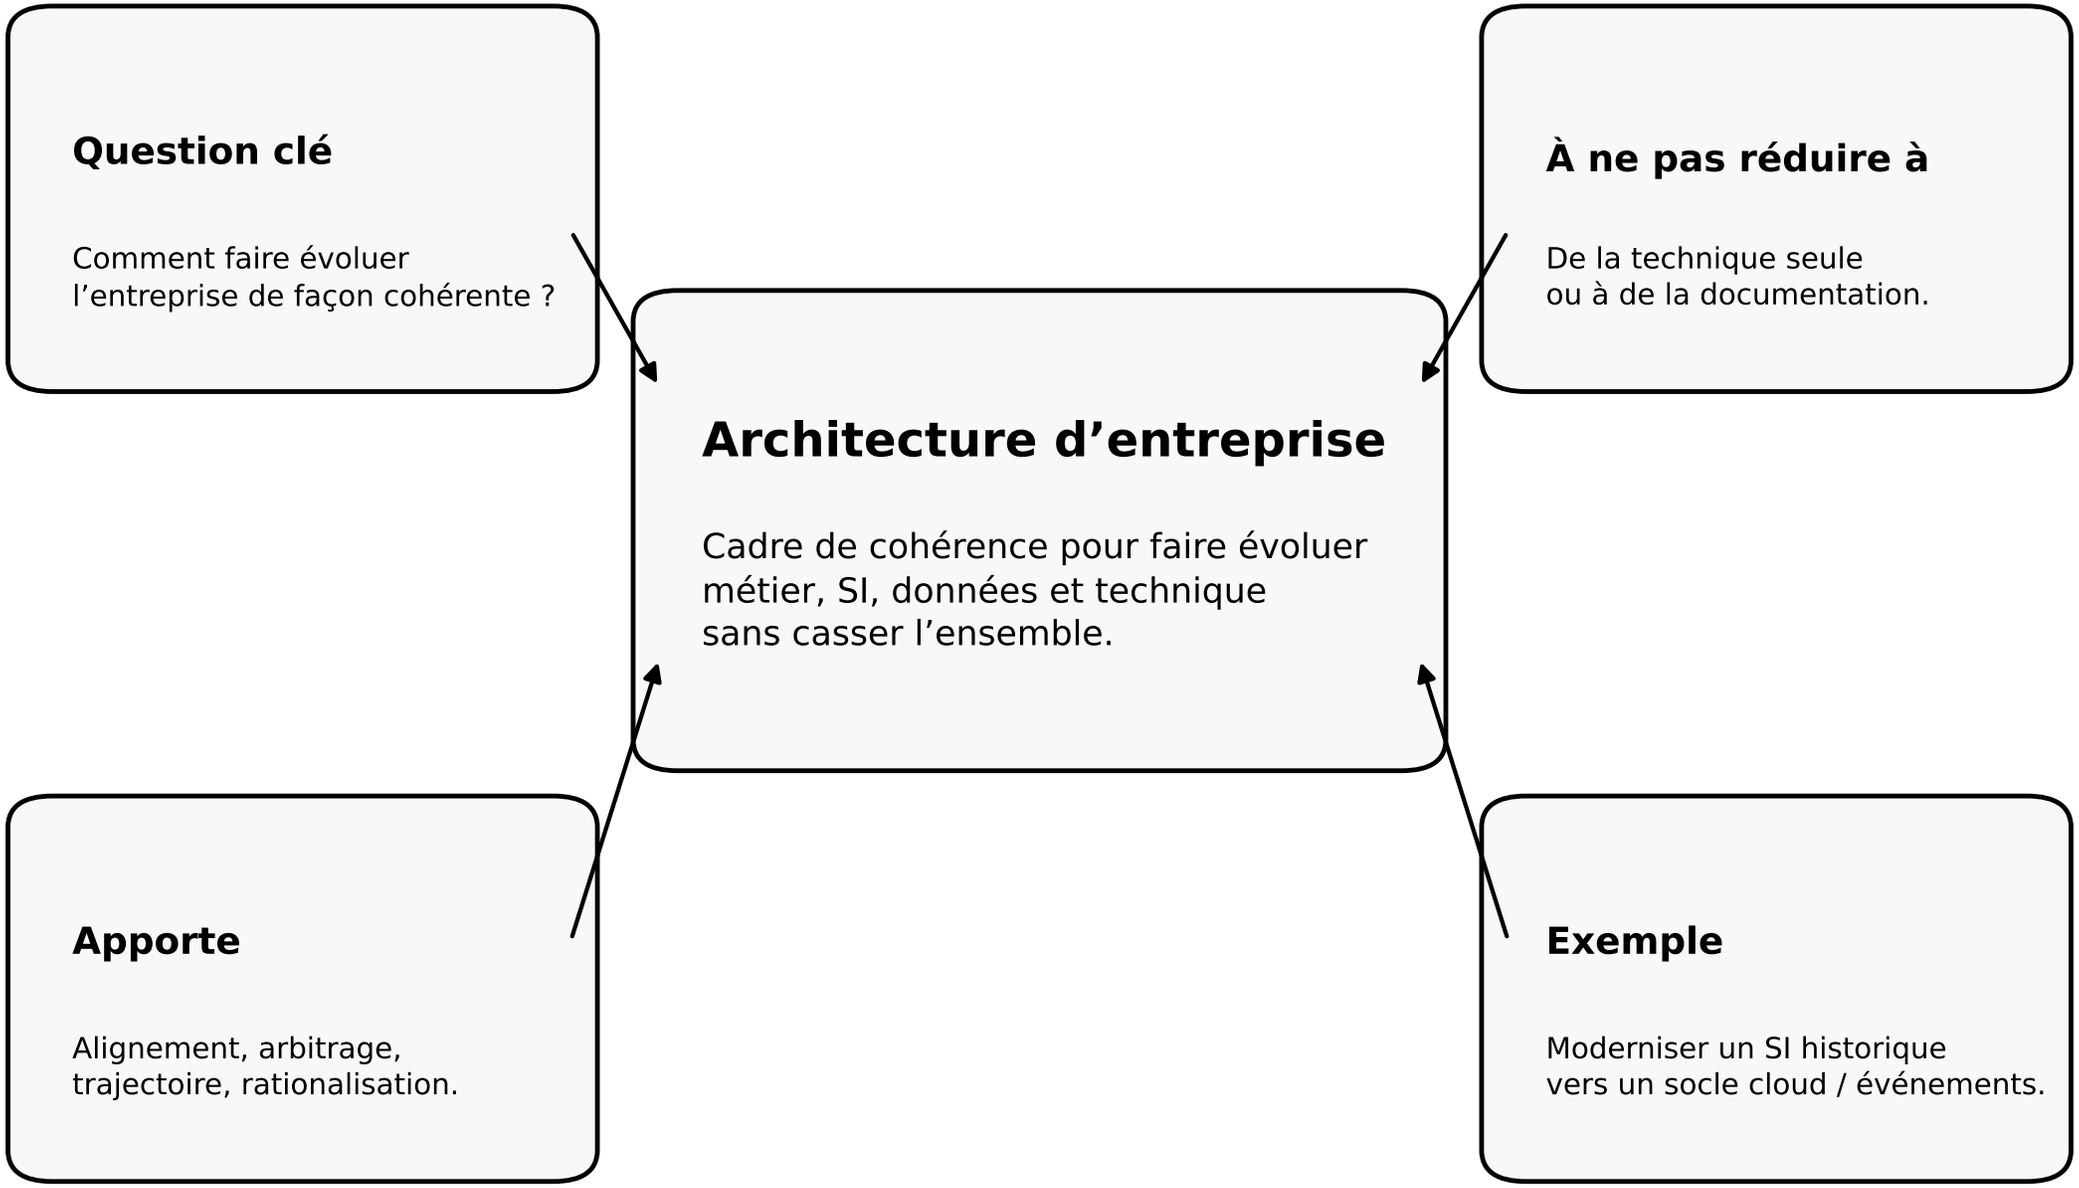

1. Lire le centre
2. Vérifier les distinctions
3. Reformuler à voix haute
4. Faire un exemple concret

Conseil de travail

Travaille ces schémas dans cet ordre : notions -> trio baseline/target/transition -> ADM global -> phases. Cherche toujours à distinguer : besoin, contrainte, principe, cible, trajectoire, gouvernance.

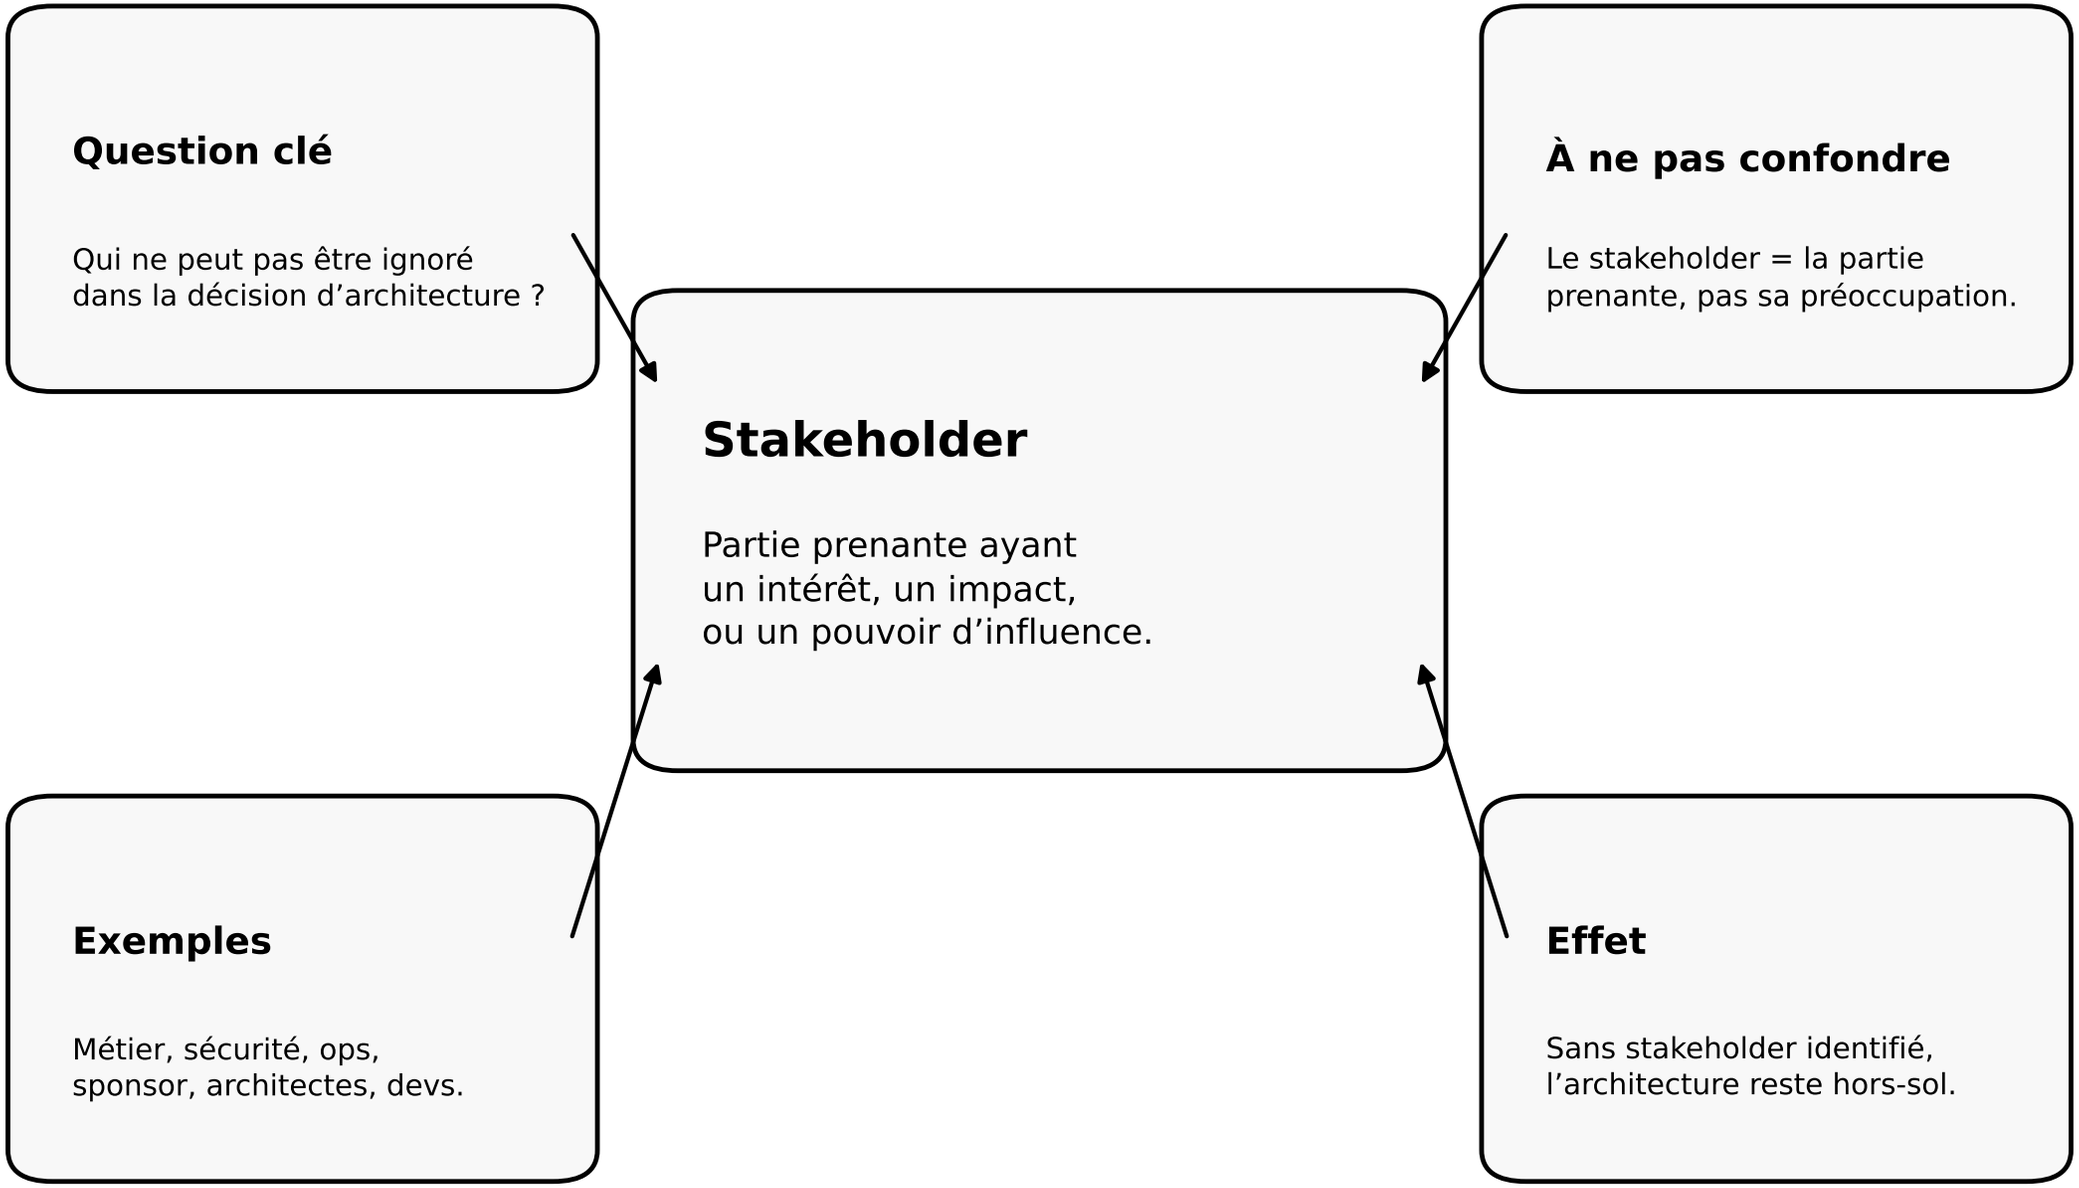

Architecture d’entreprise

TOGAF Part 1 — schéma de révision

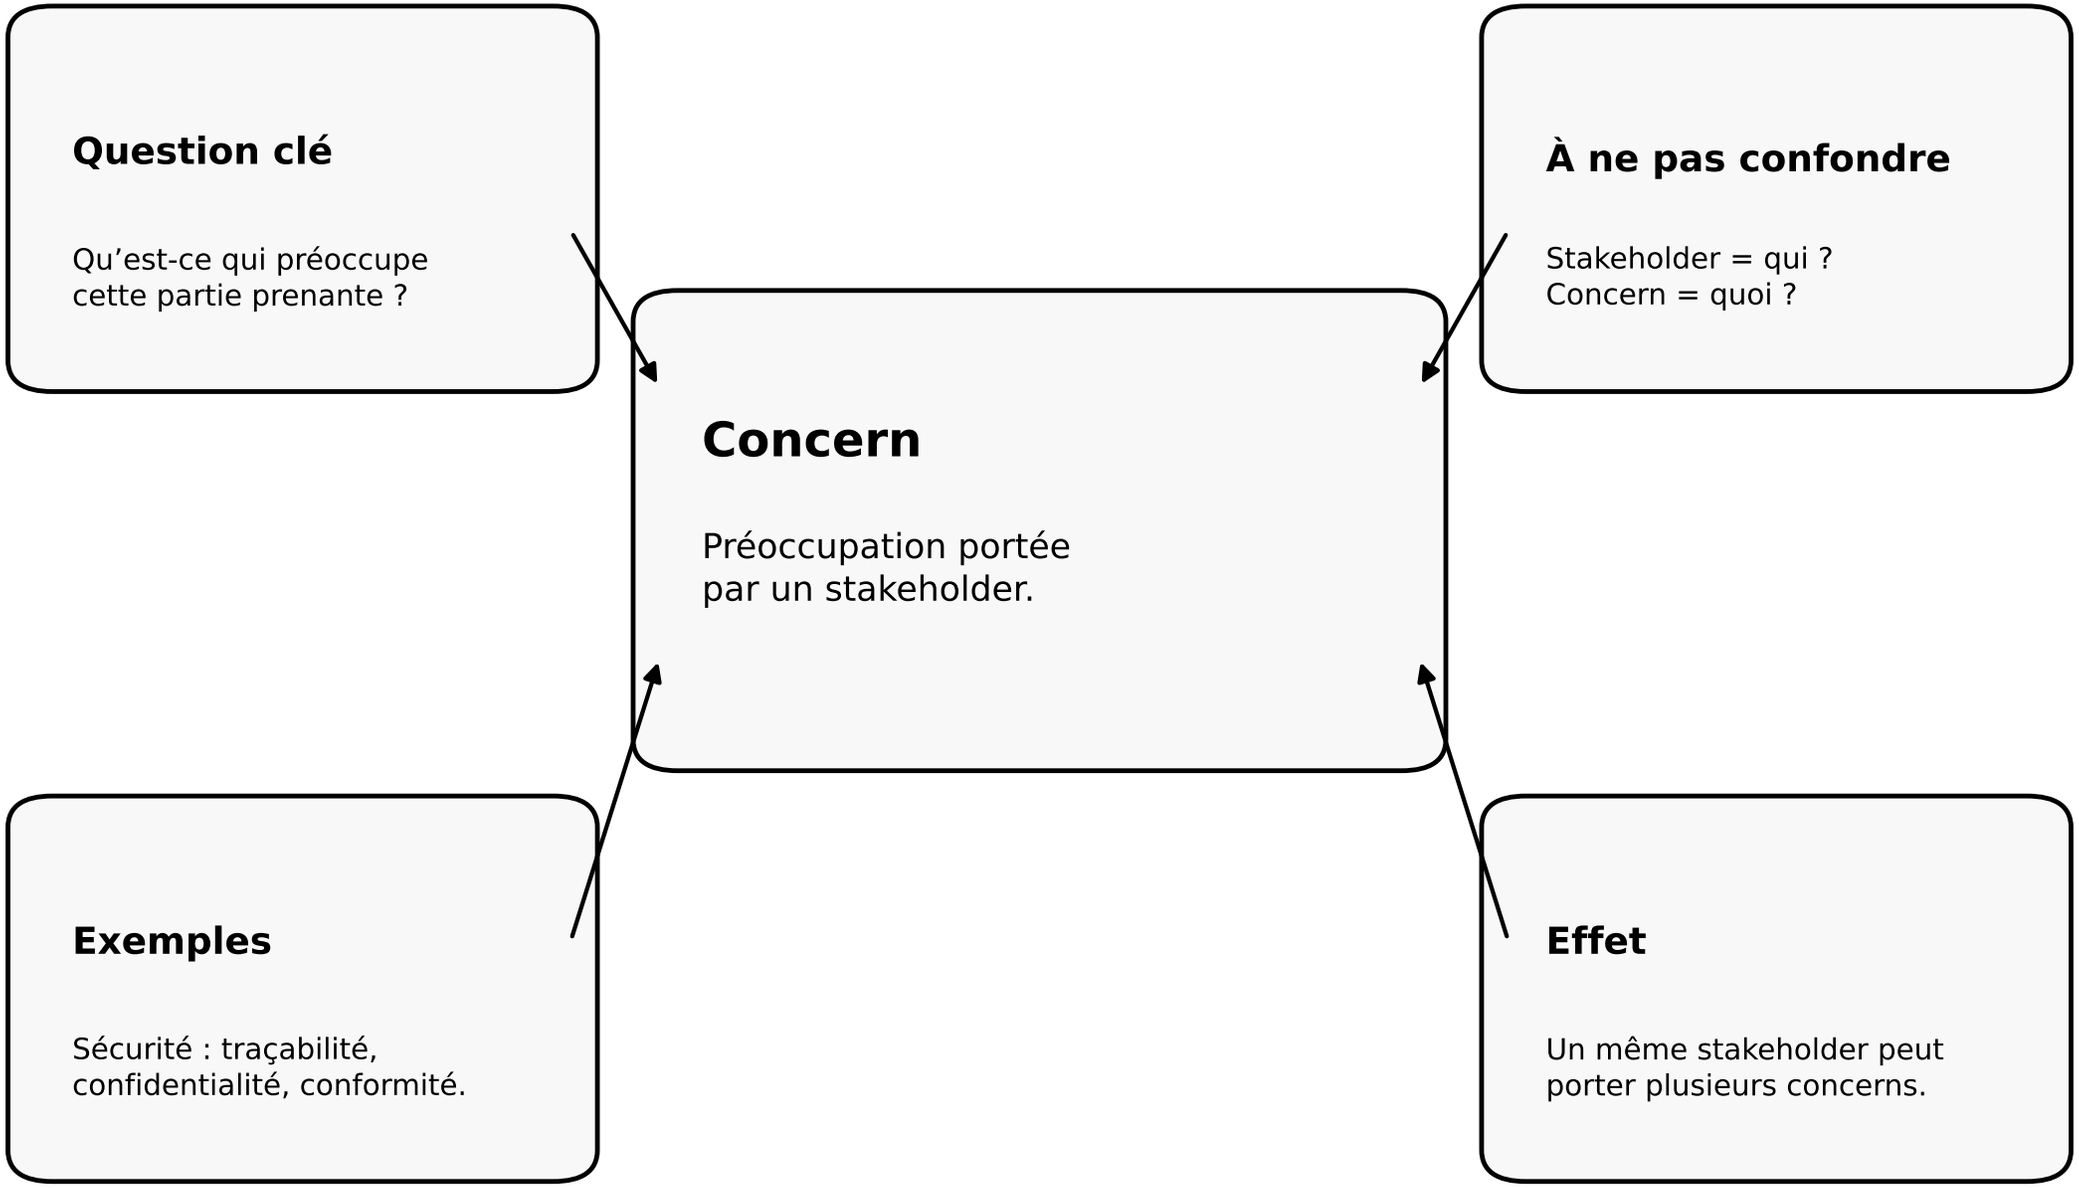

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Stakeholder

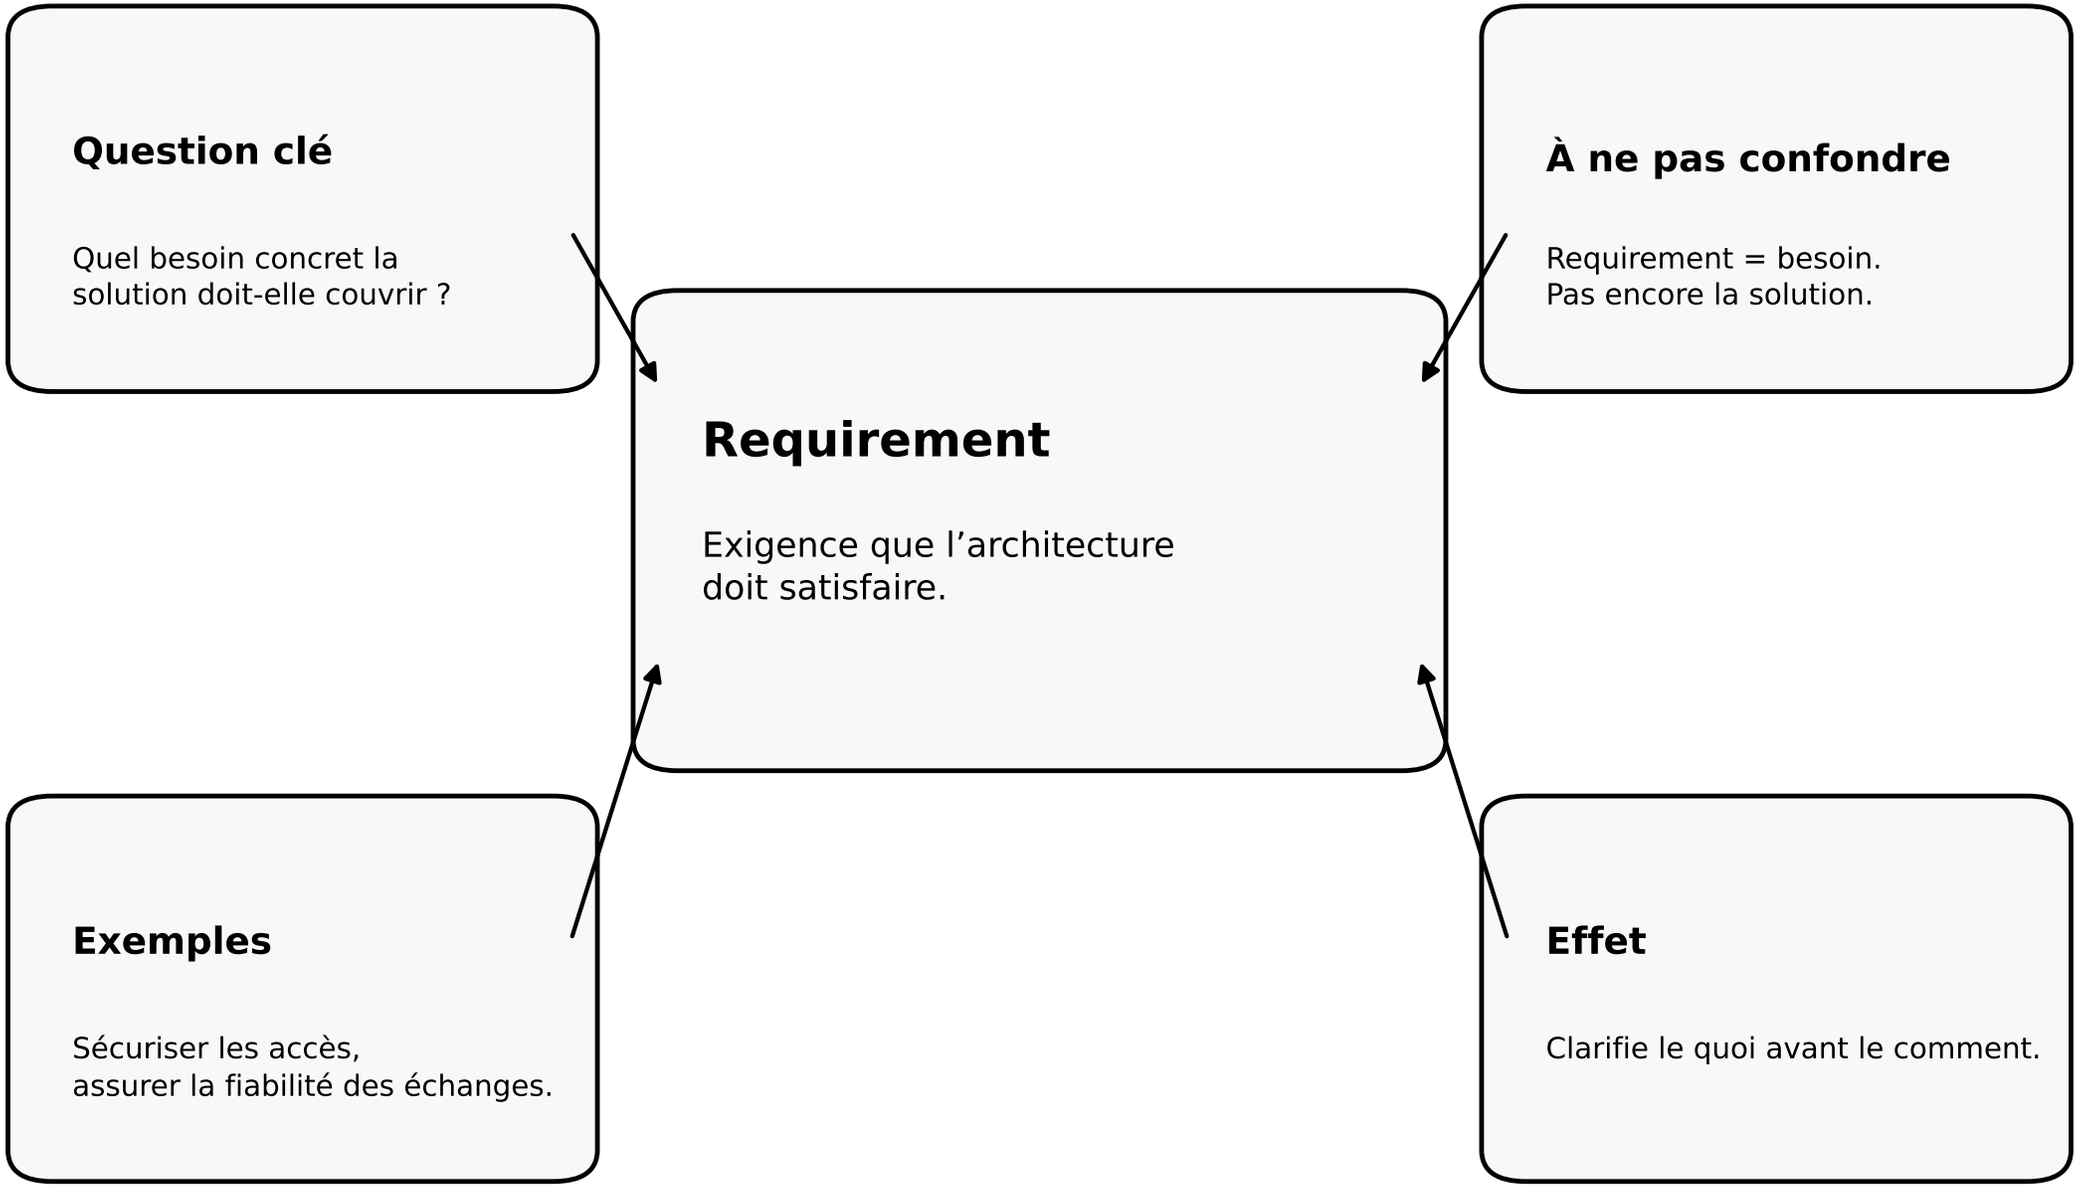

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Concern

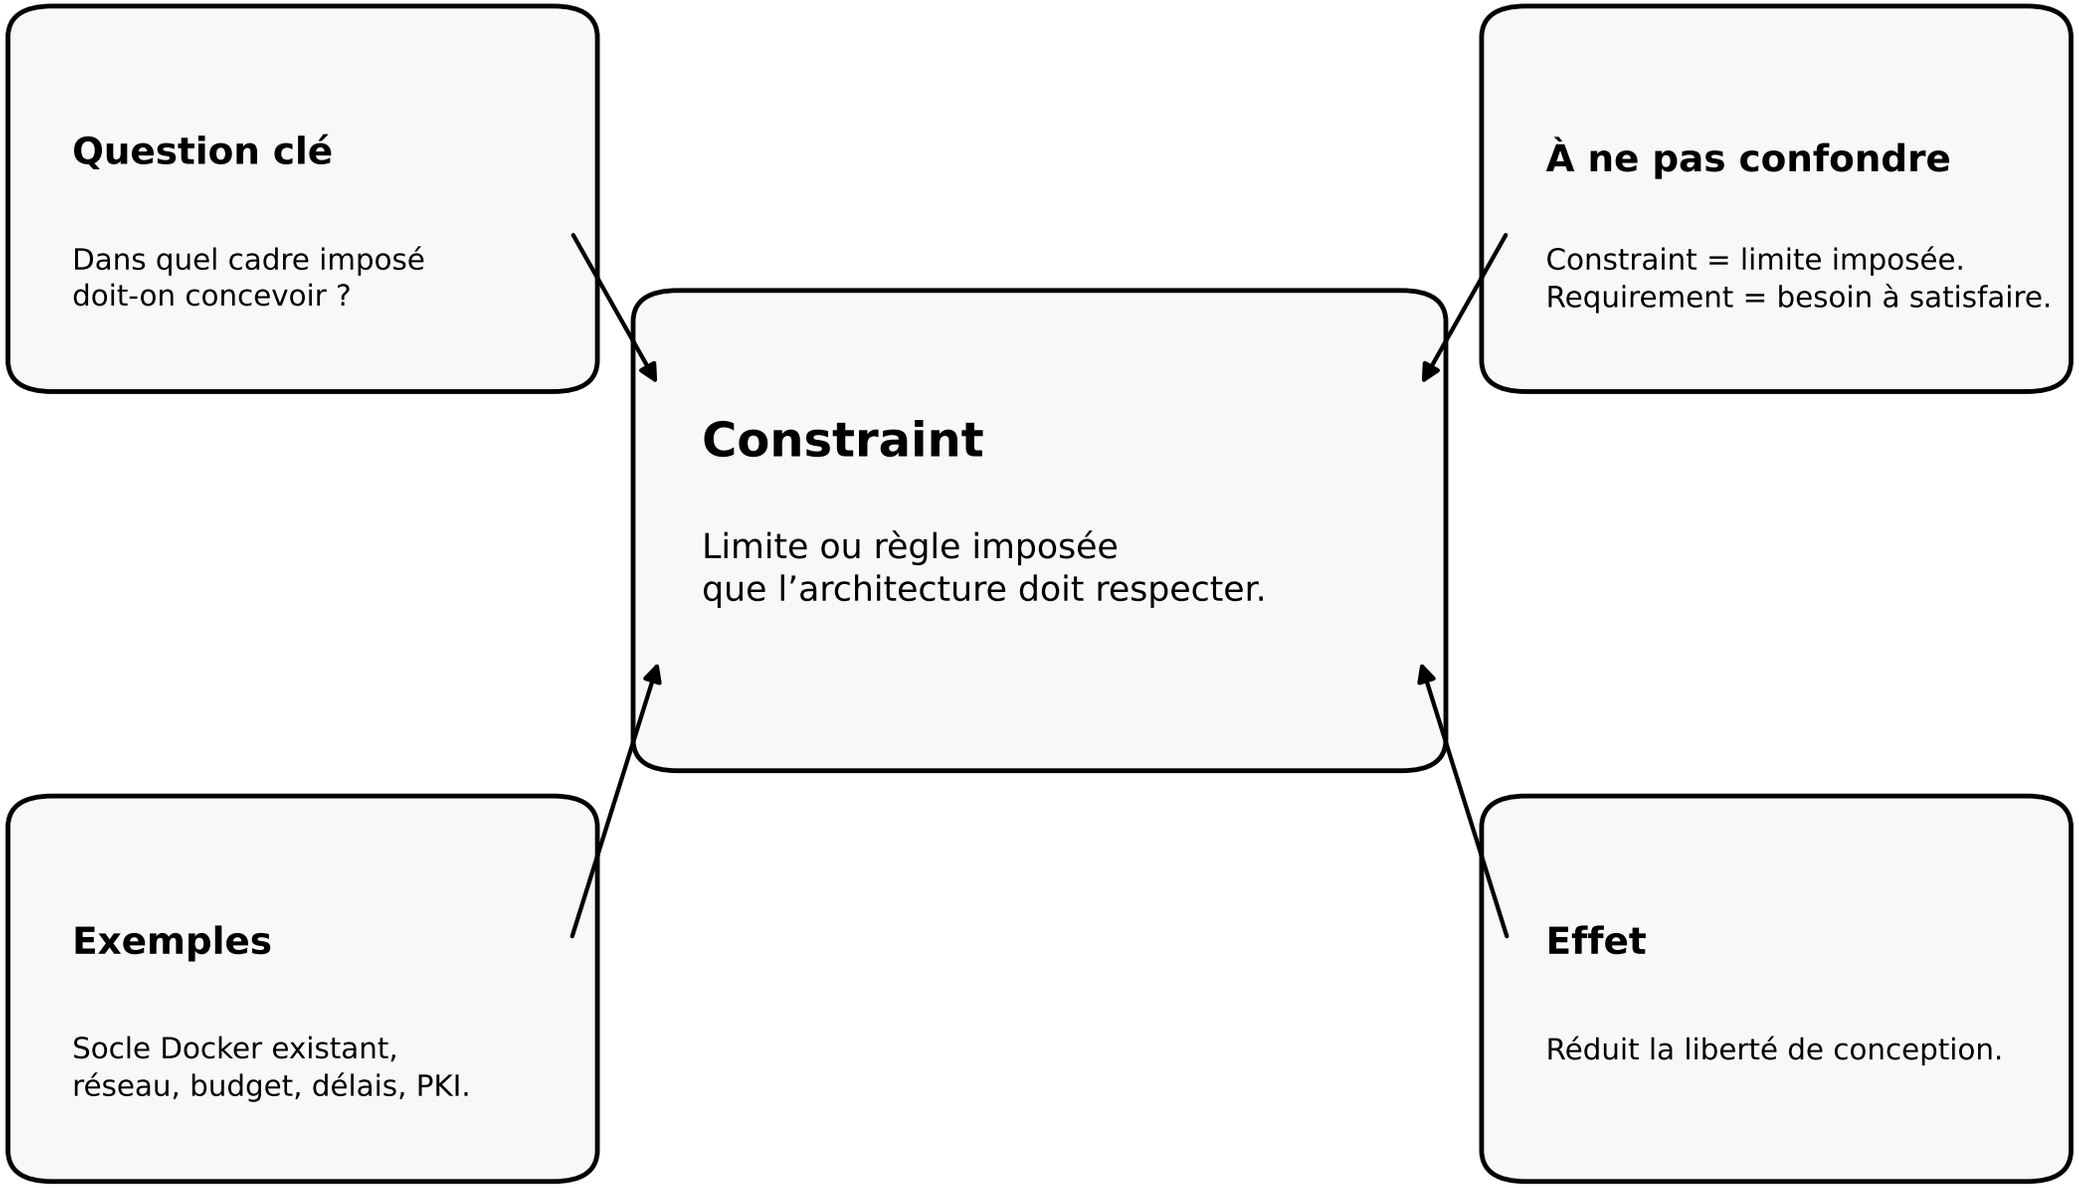

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Requirement

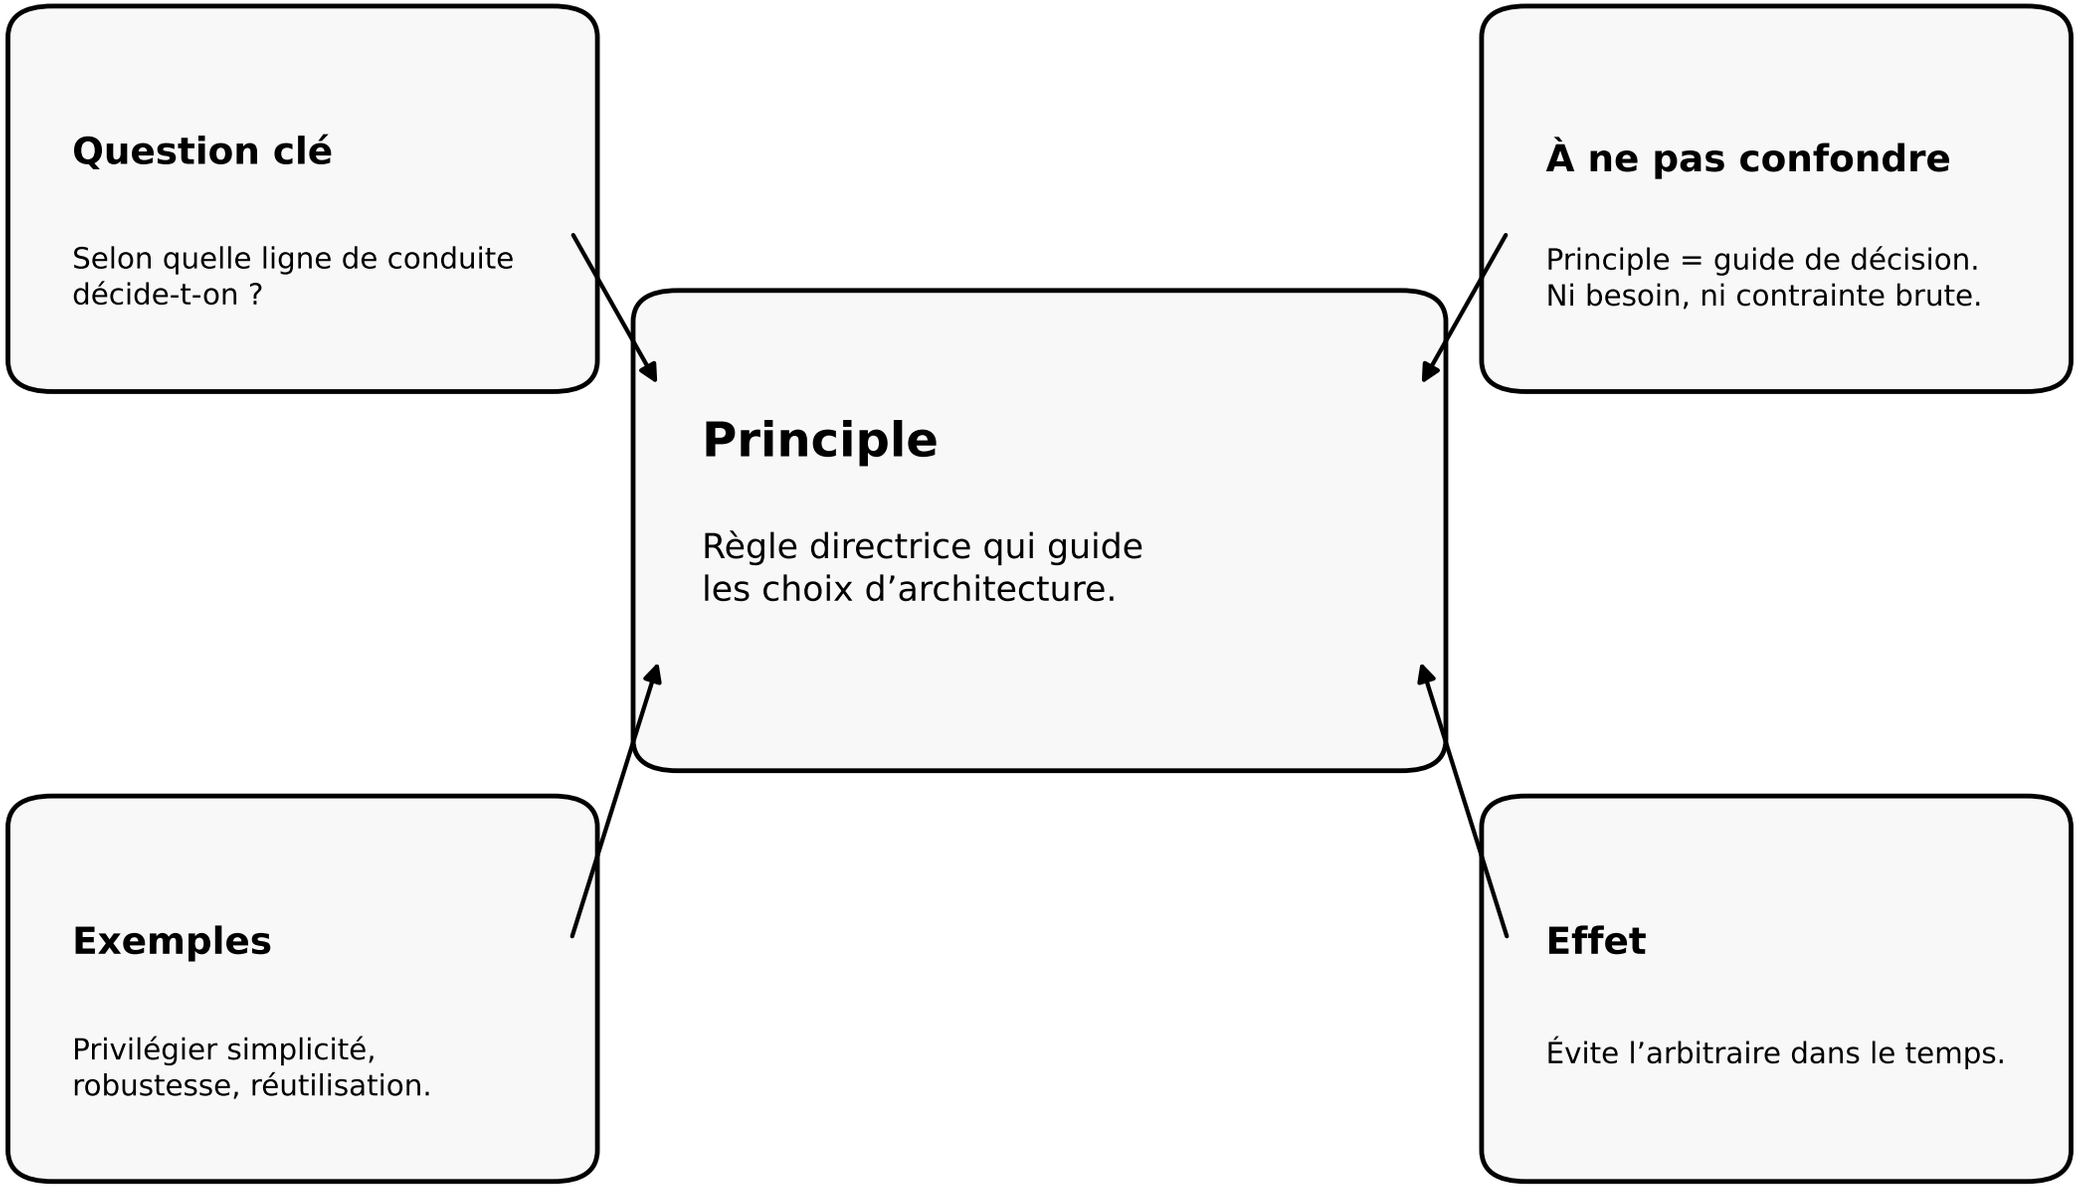

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Constraint

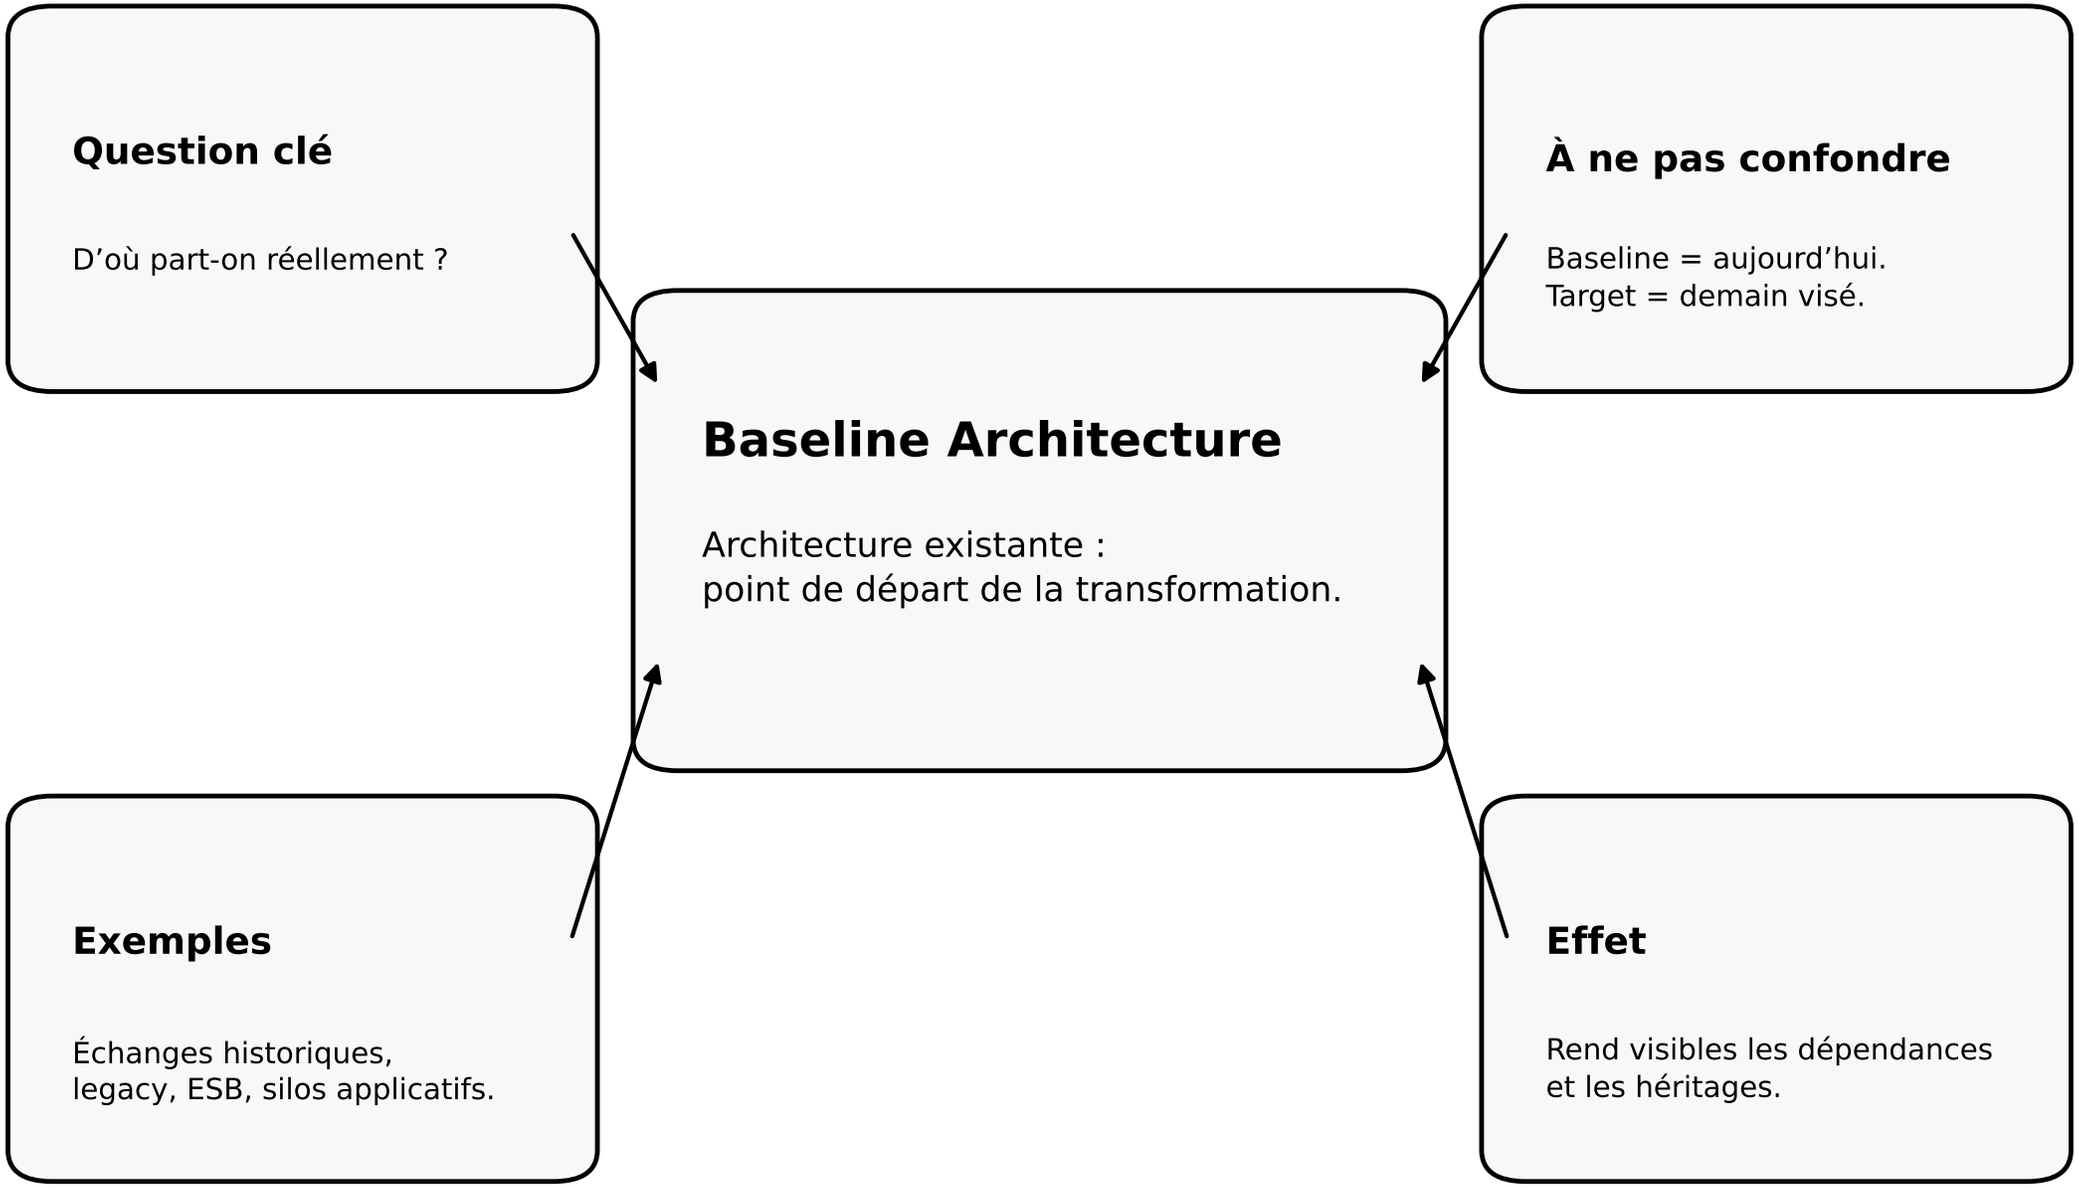

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Principle

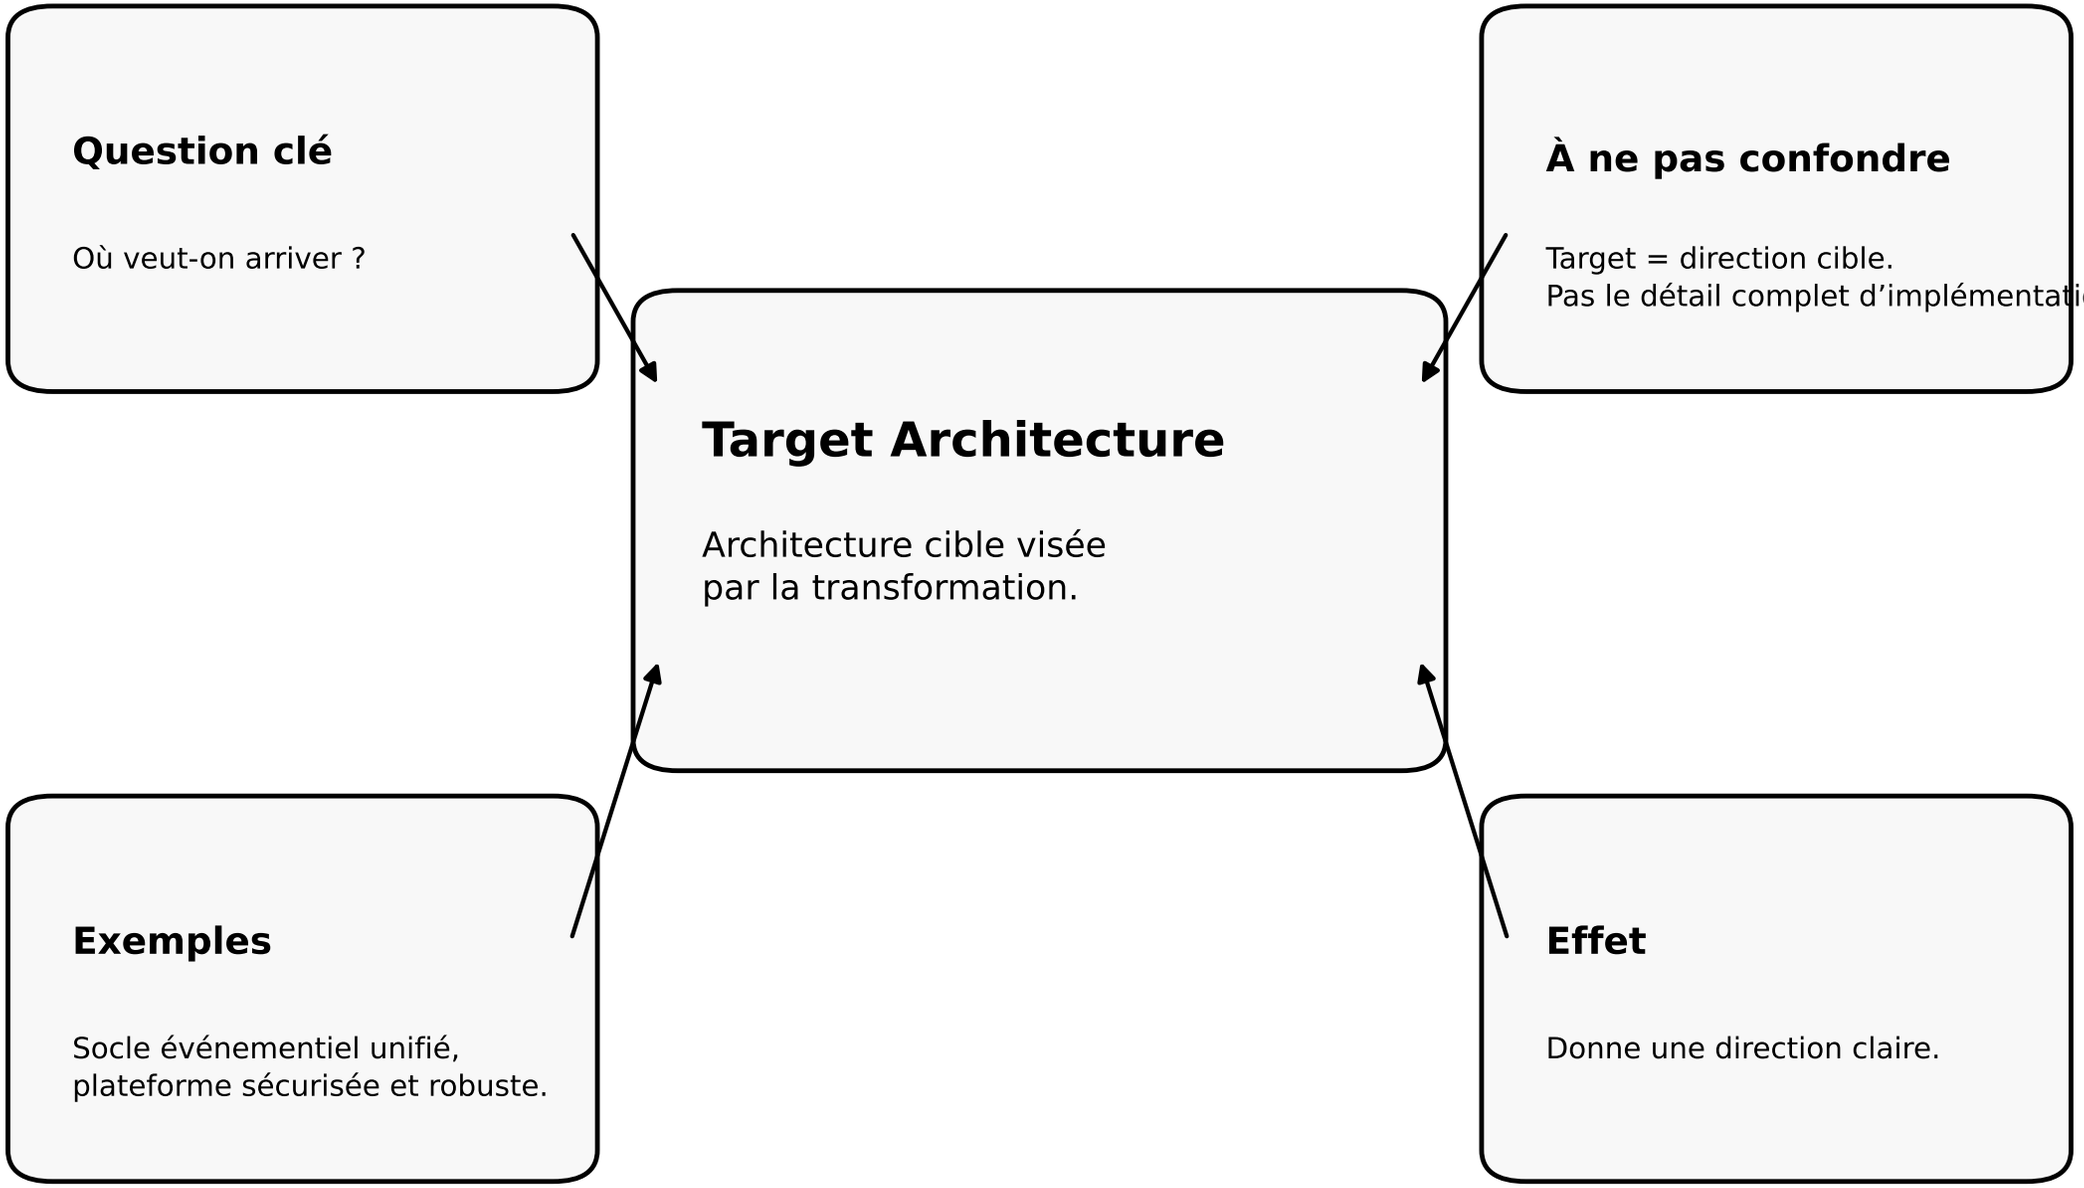

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Baseline Architecture

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

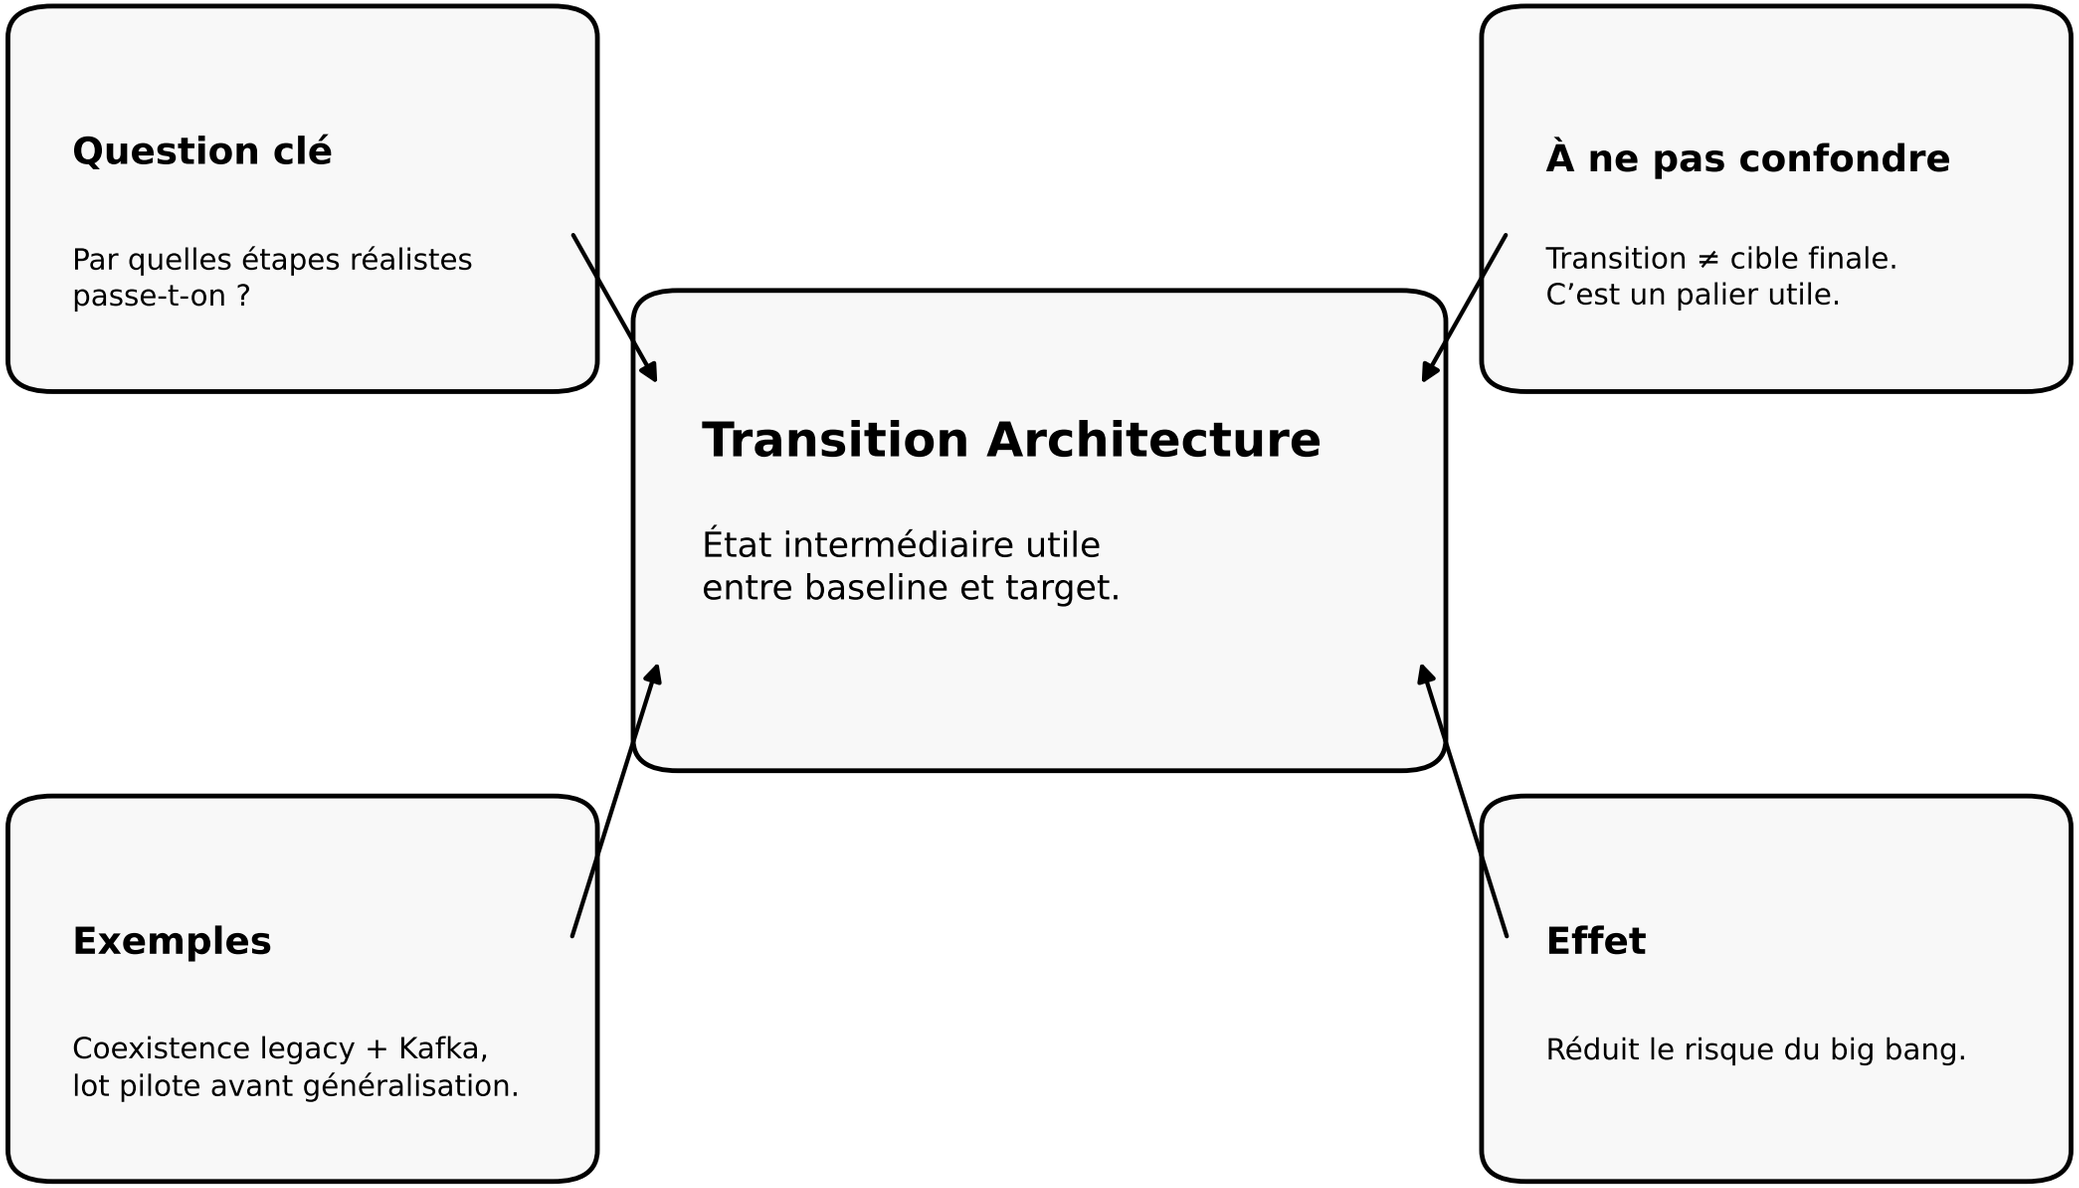

Target Architecture

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

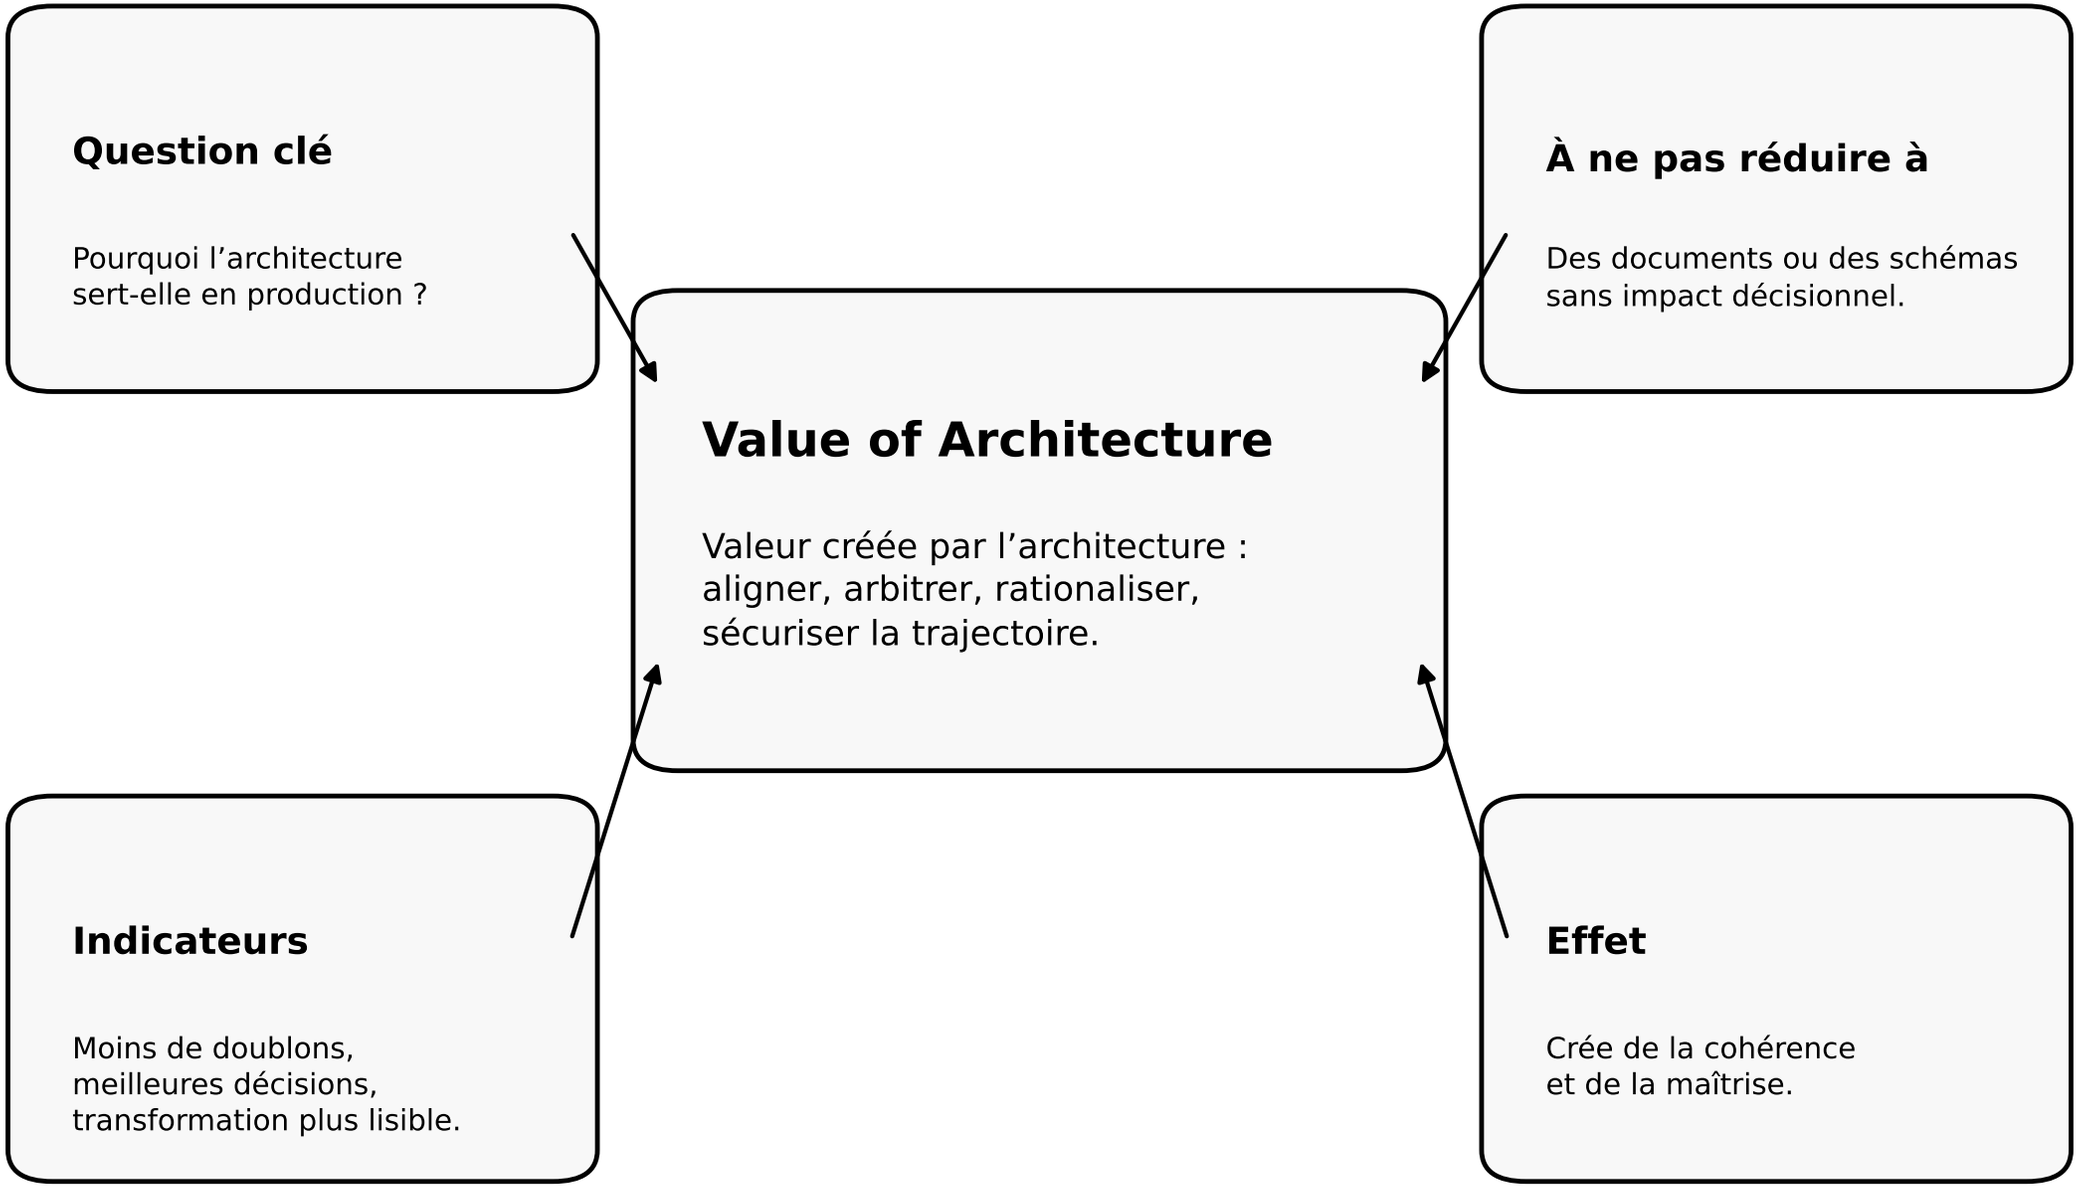

Transition Architecture

TOGAF Part 1 — schéma de révision

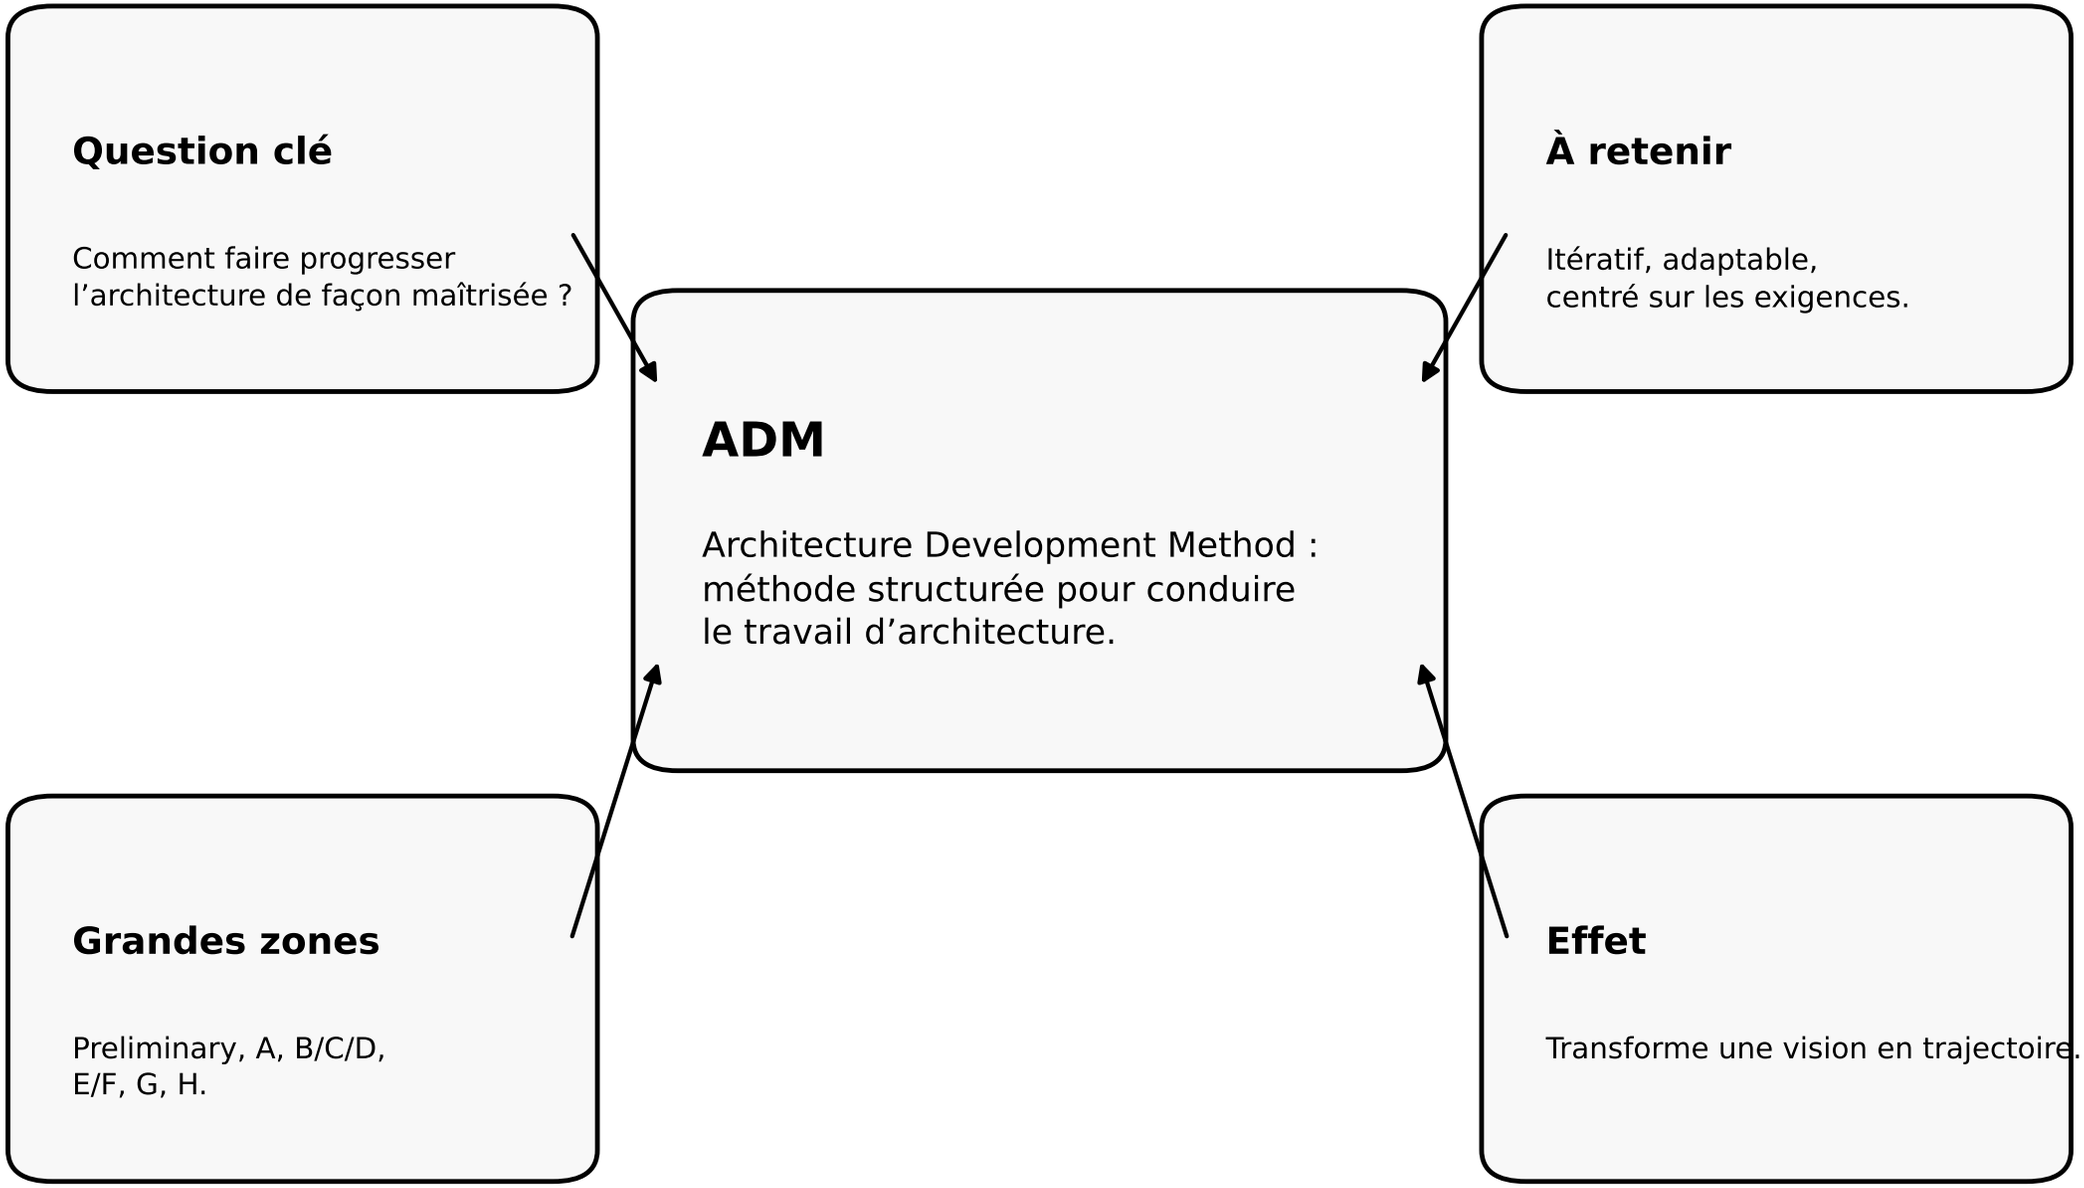

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Value of Architecture

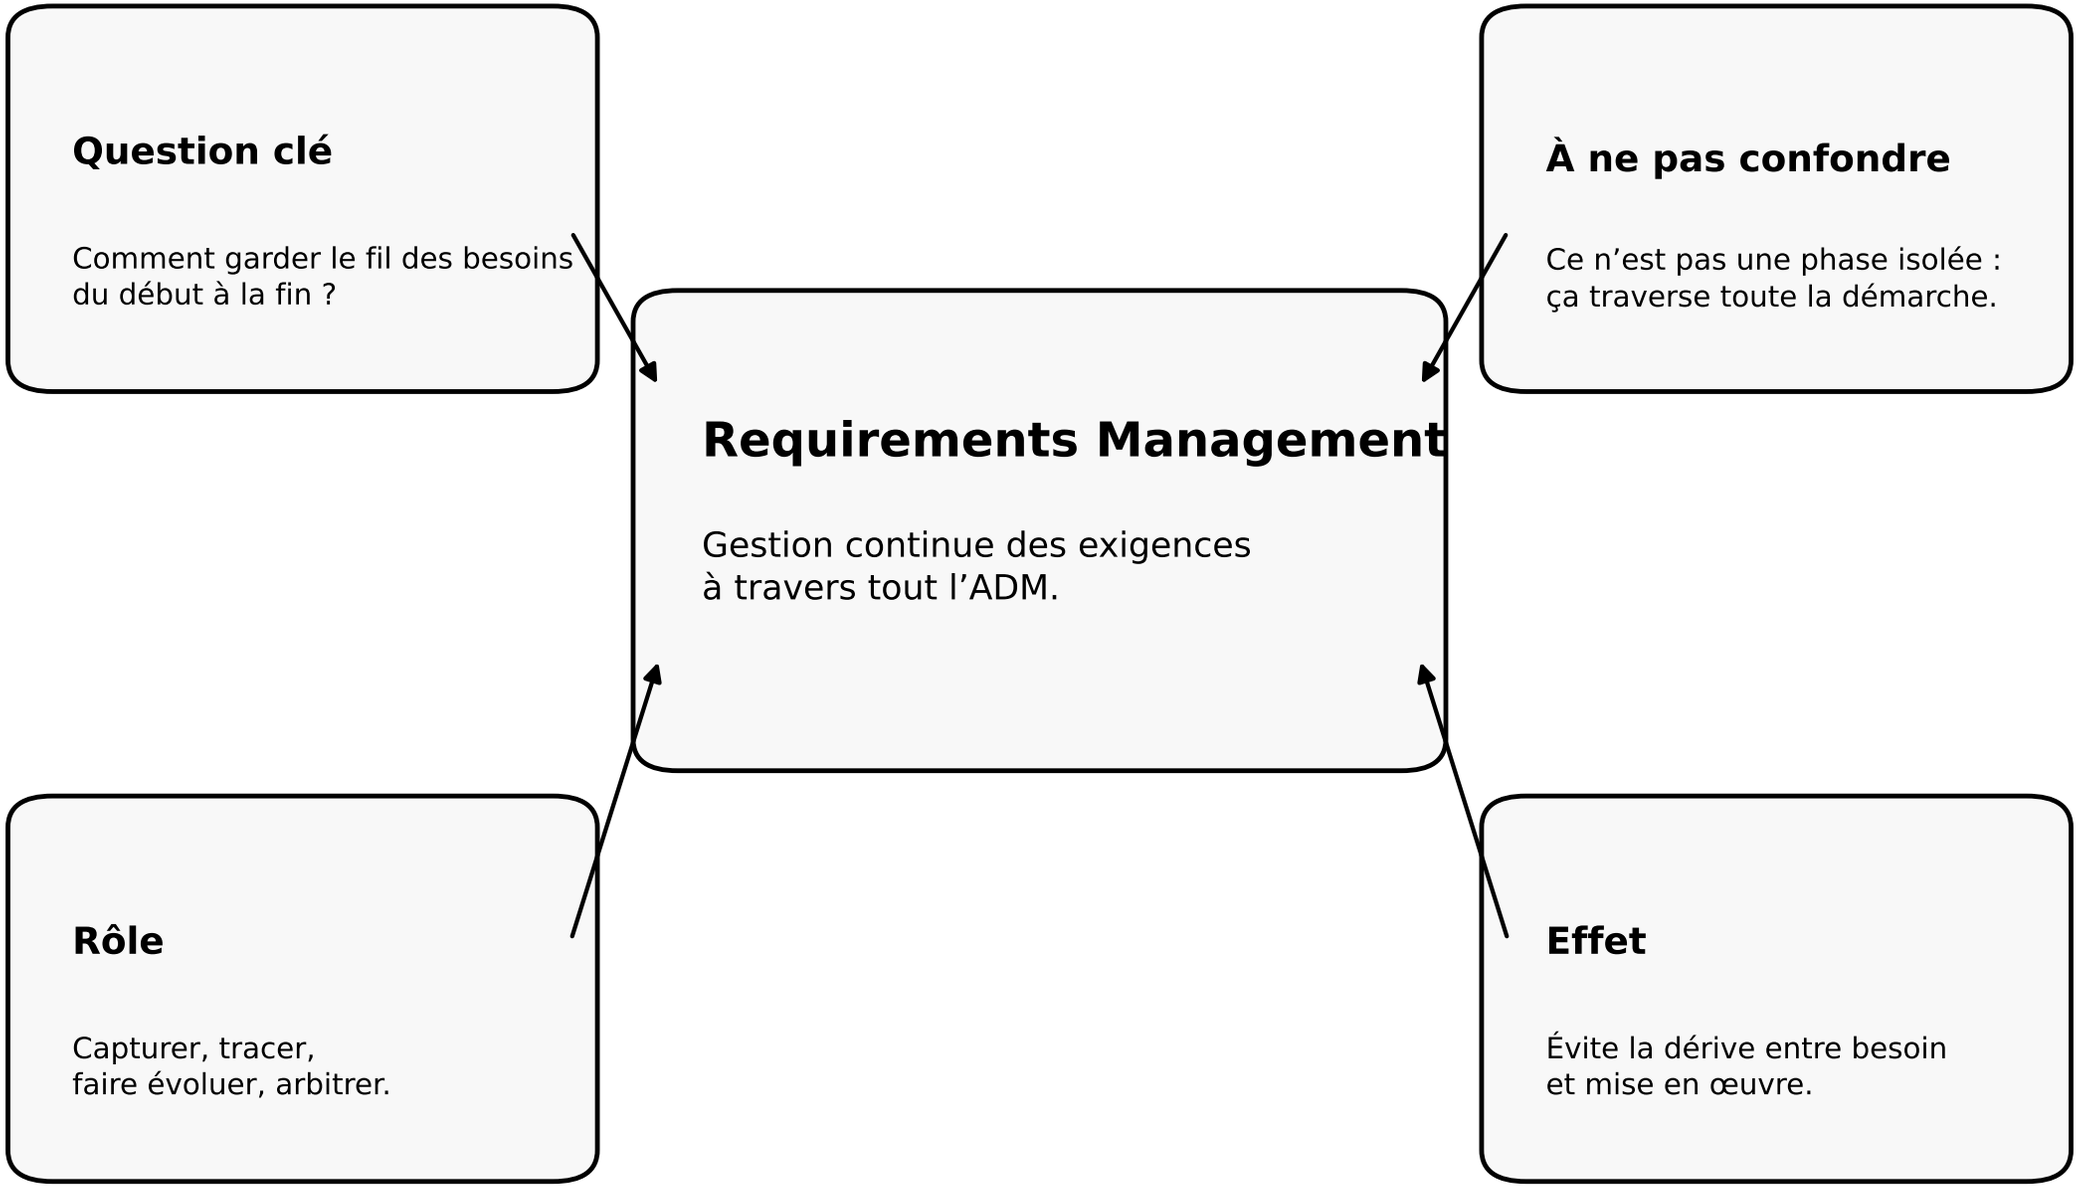

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

ADM

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

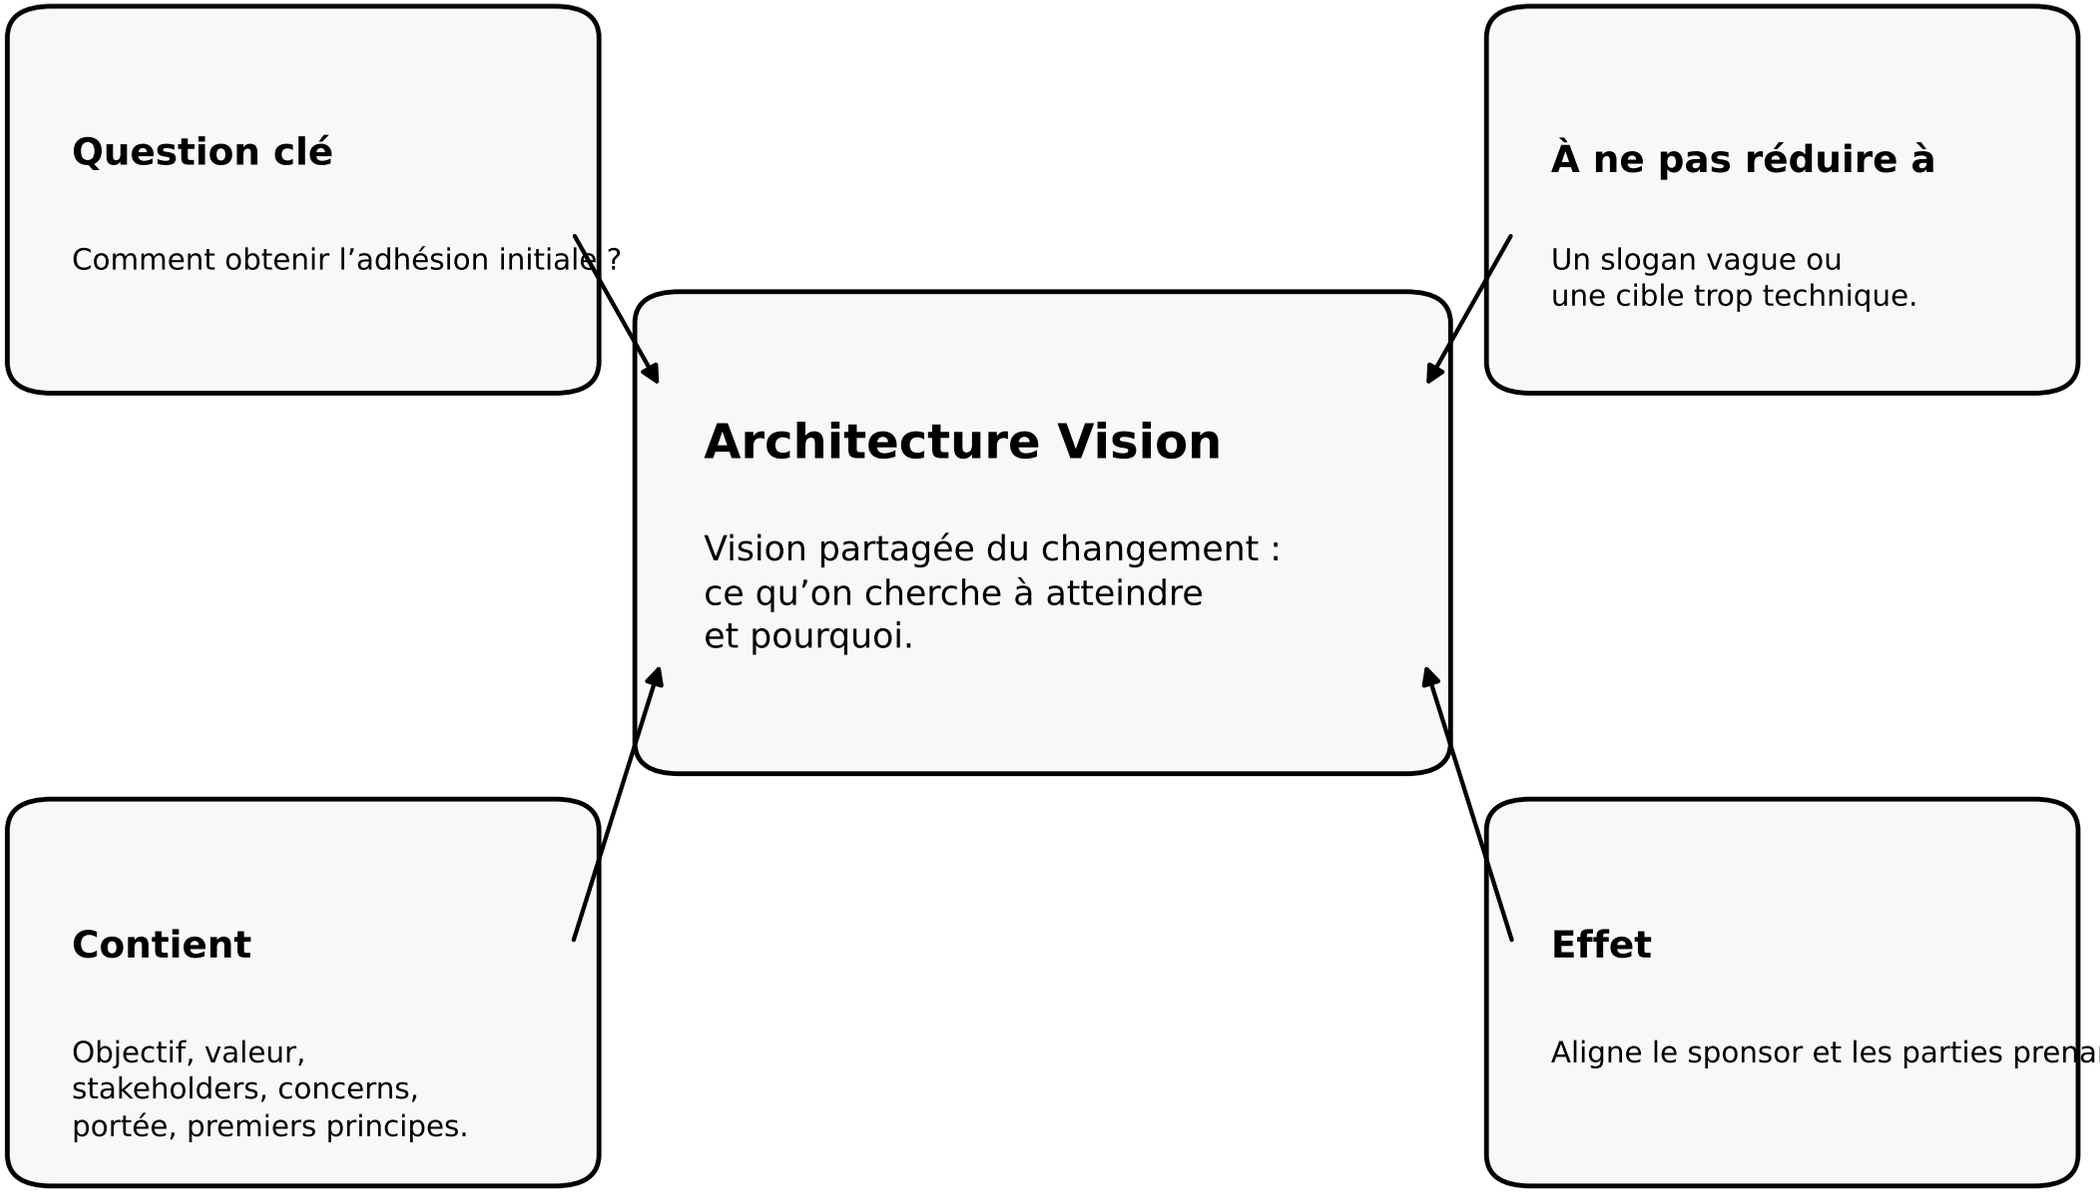

Requirements Management

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

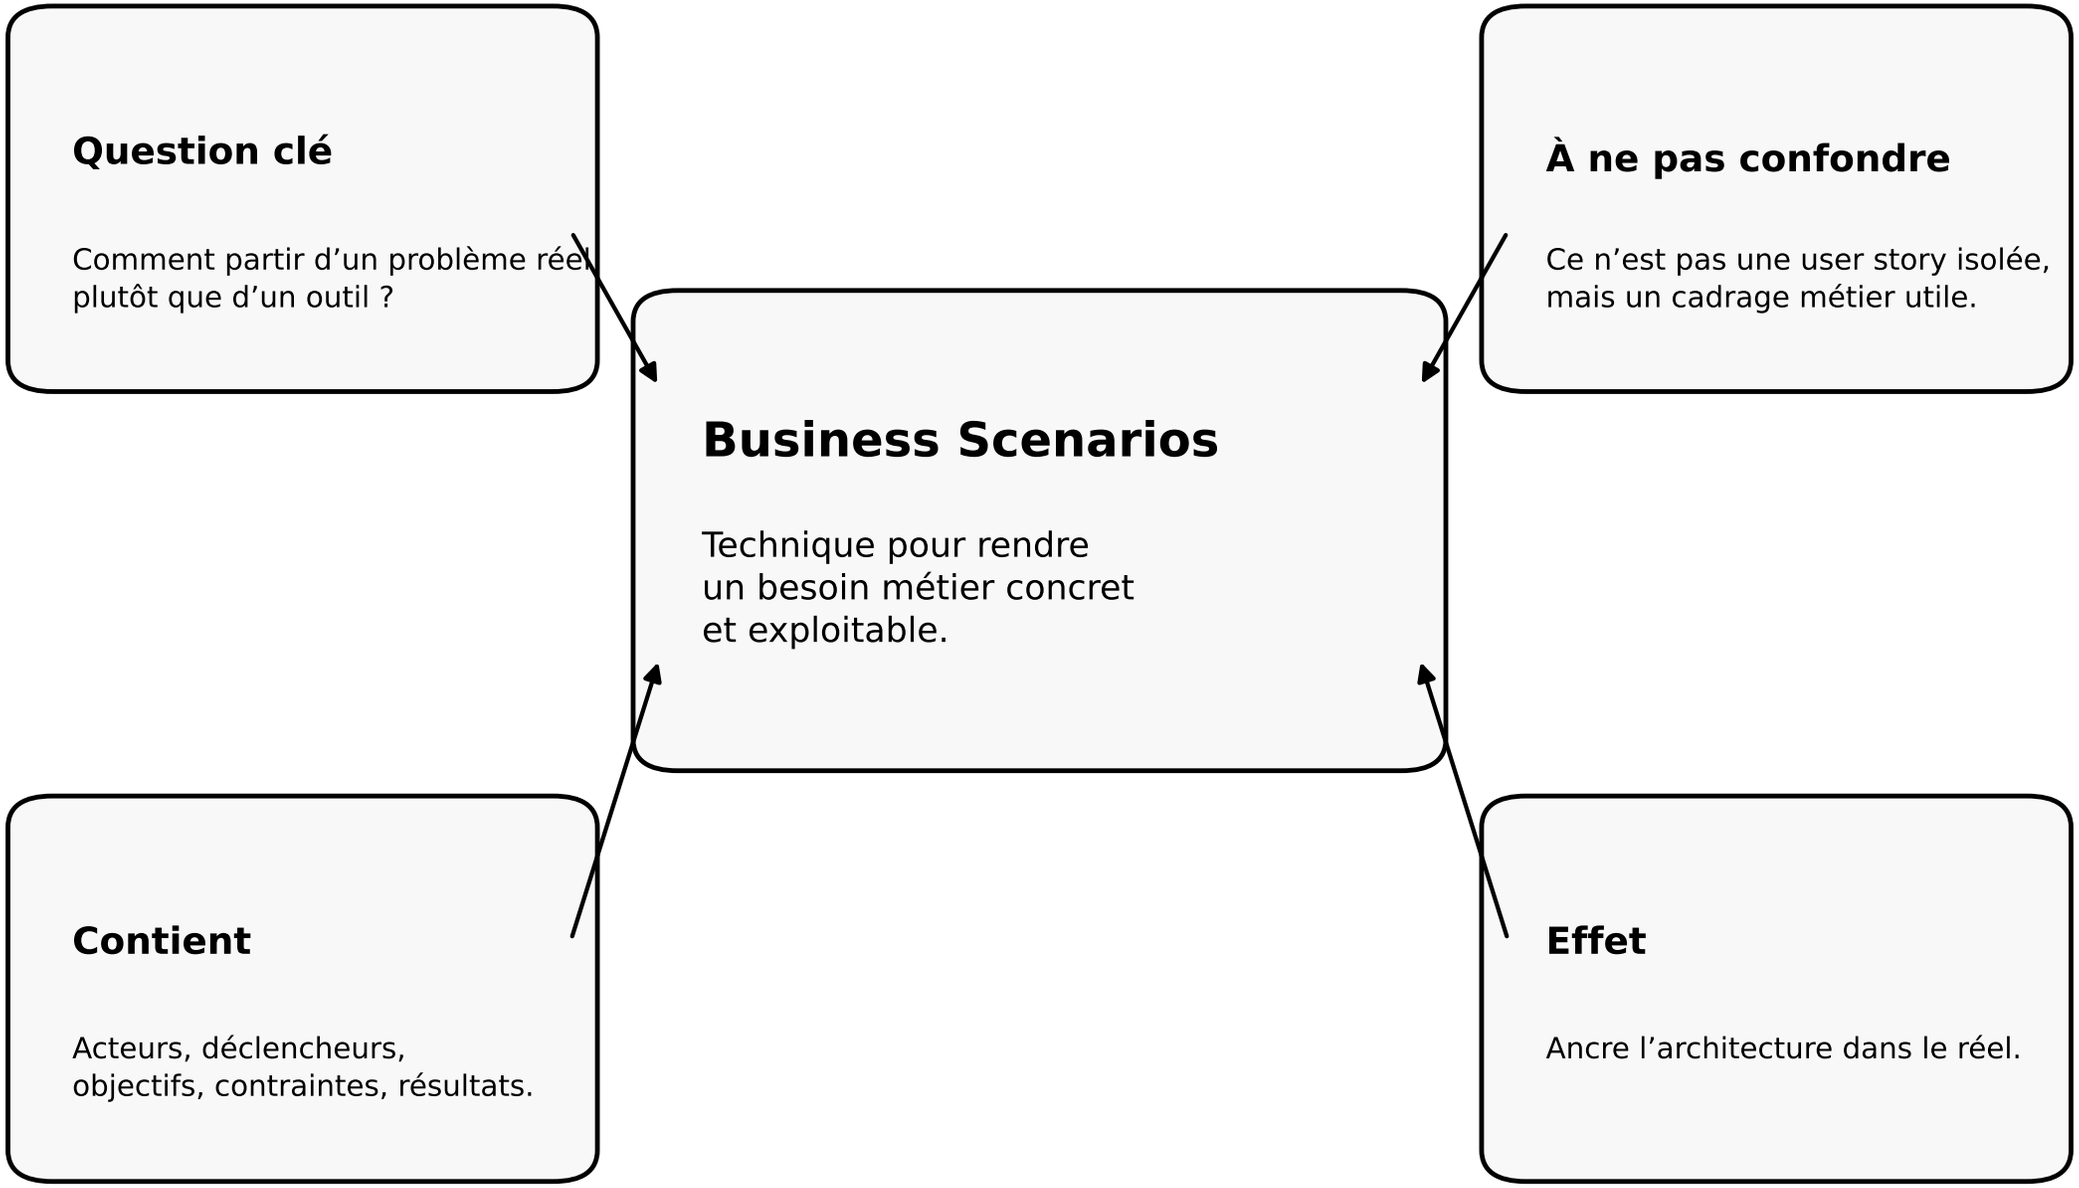

Architecture Vision

TOGAF Part 1 — schéma de révision

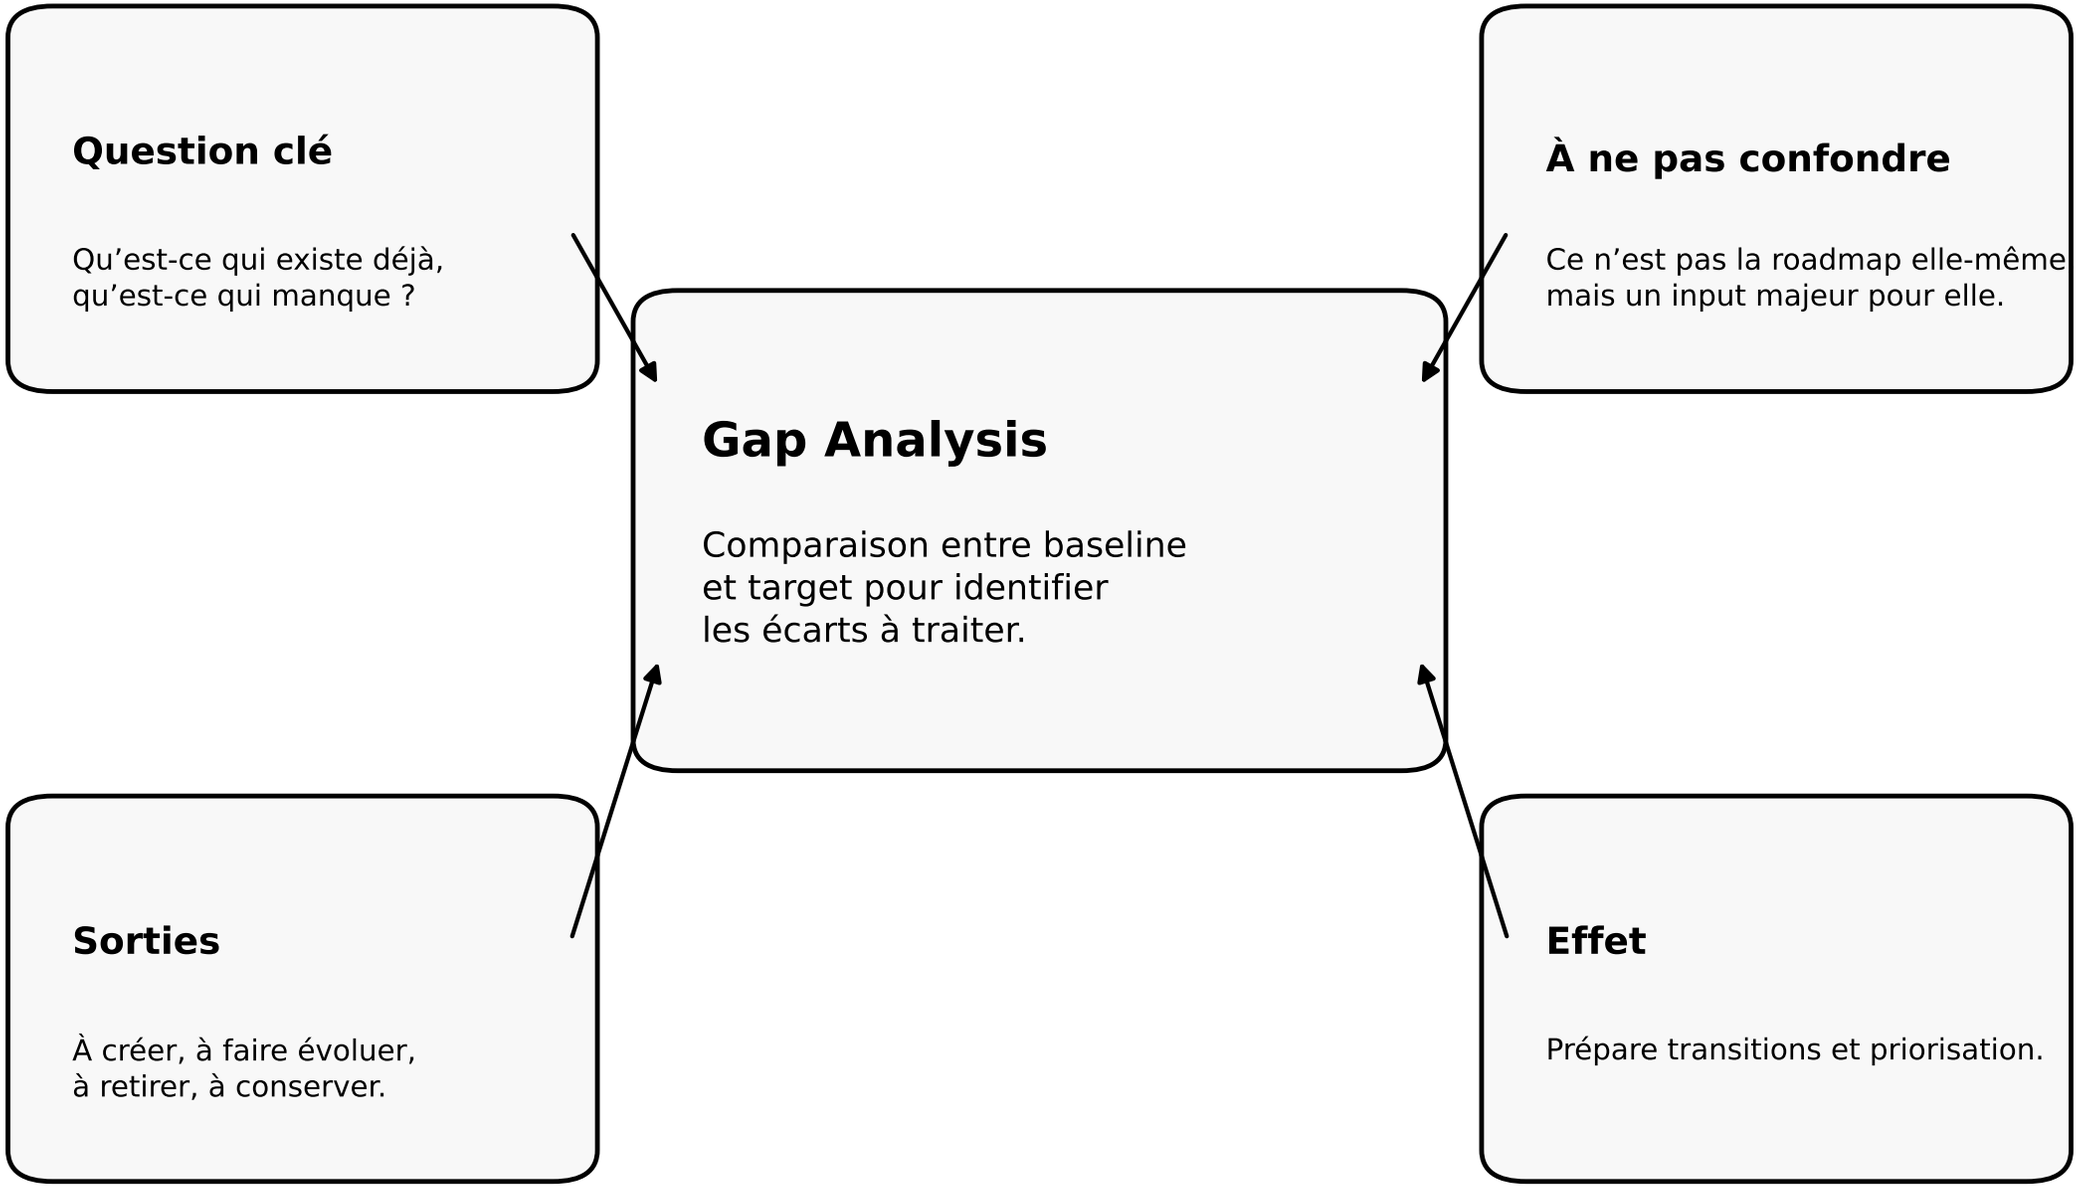

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Business Scenarios

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

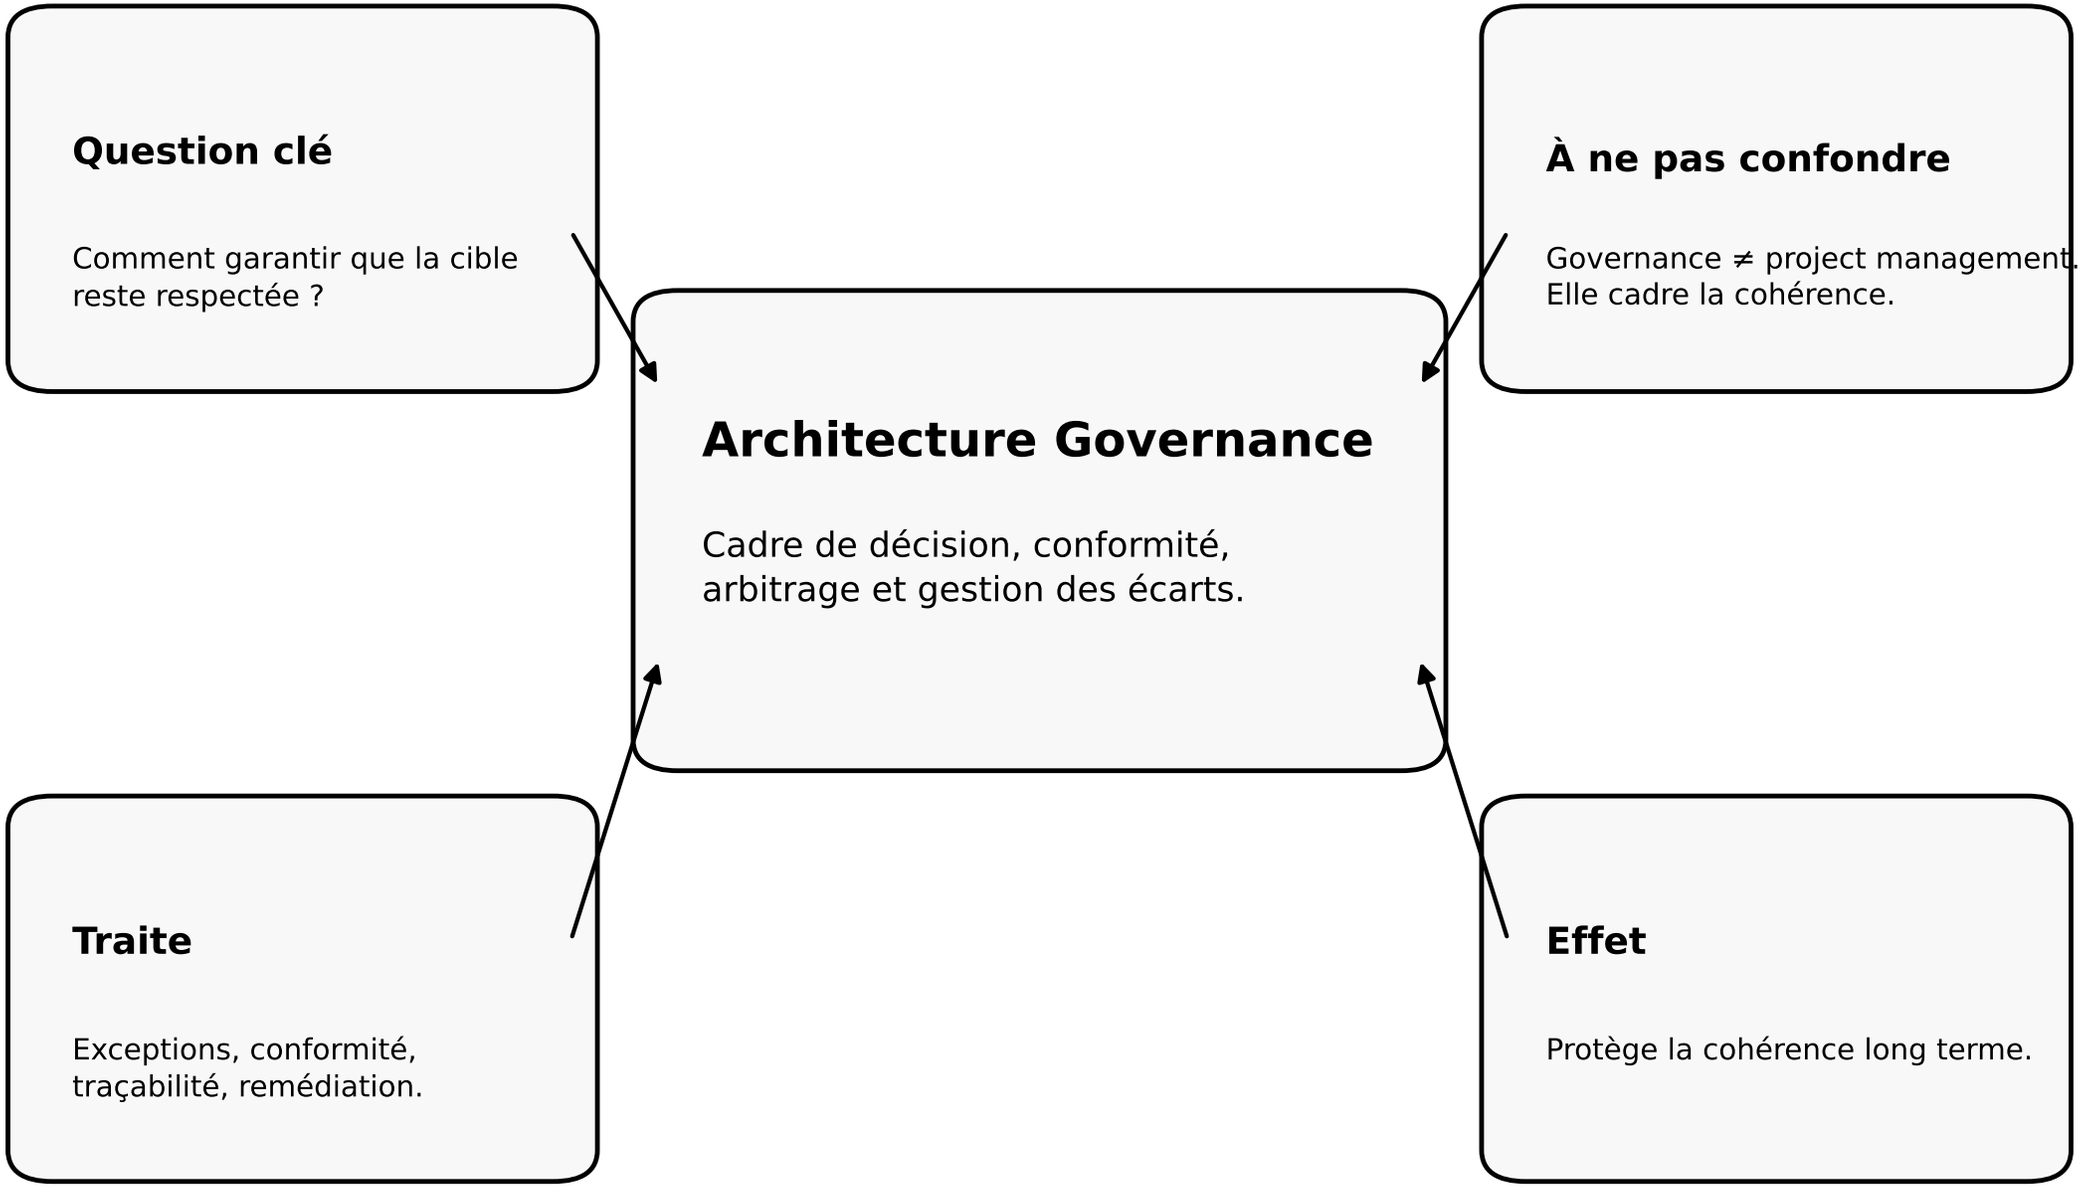

Gap Analysis

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

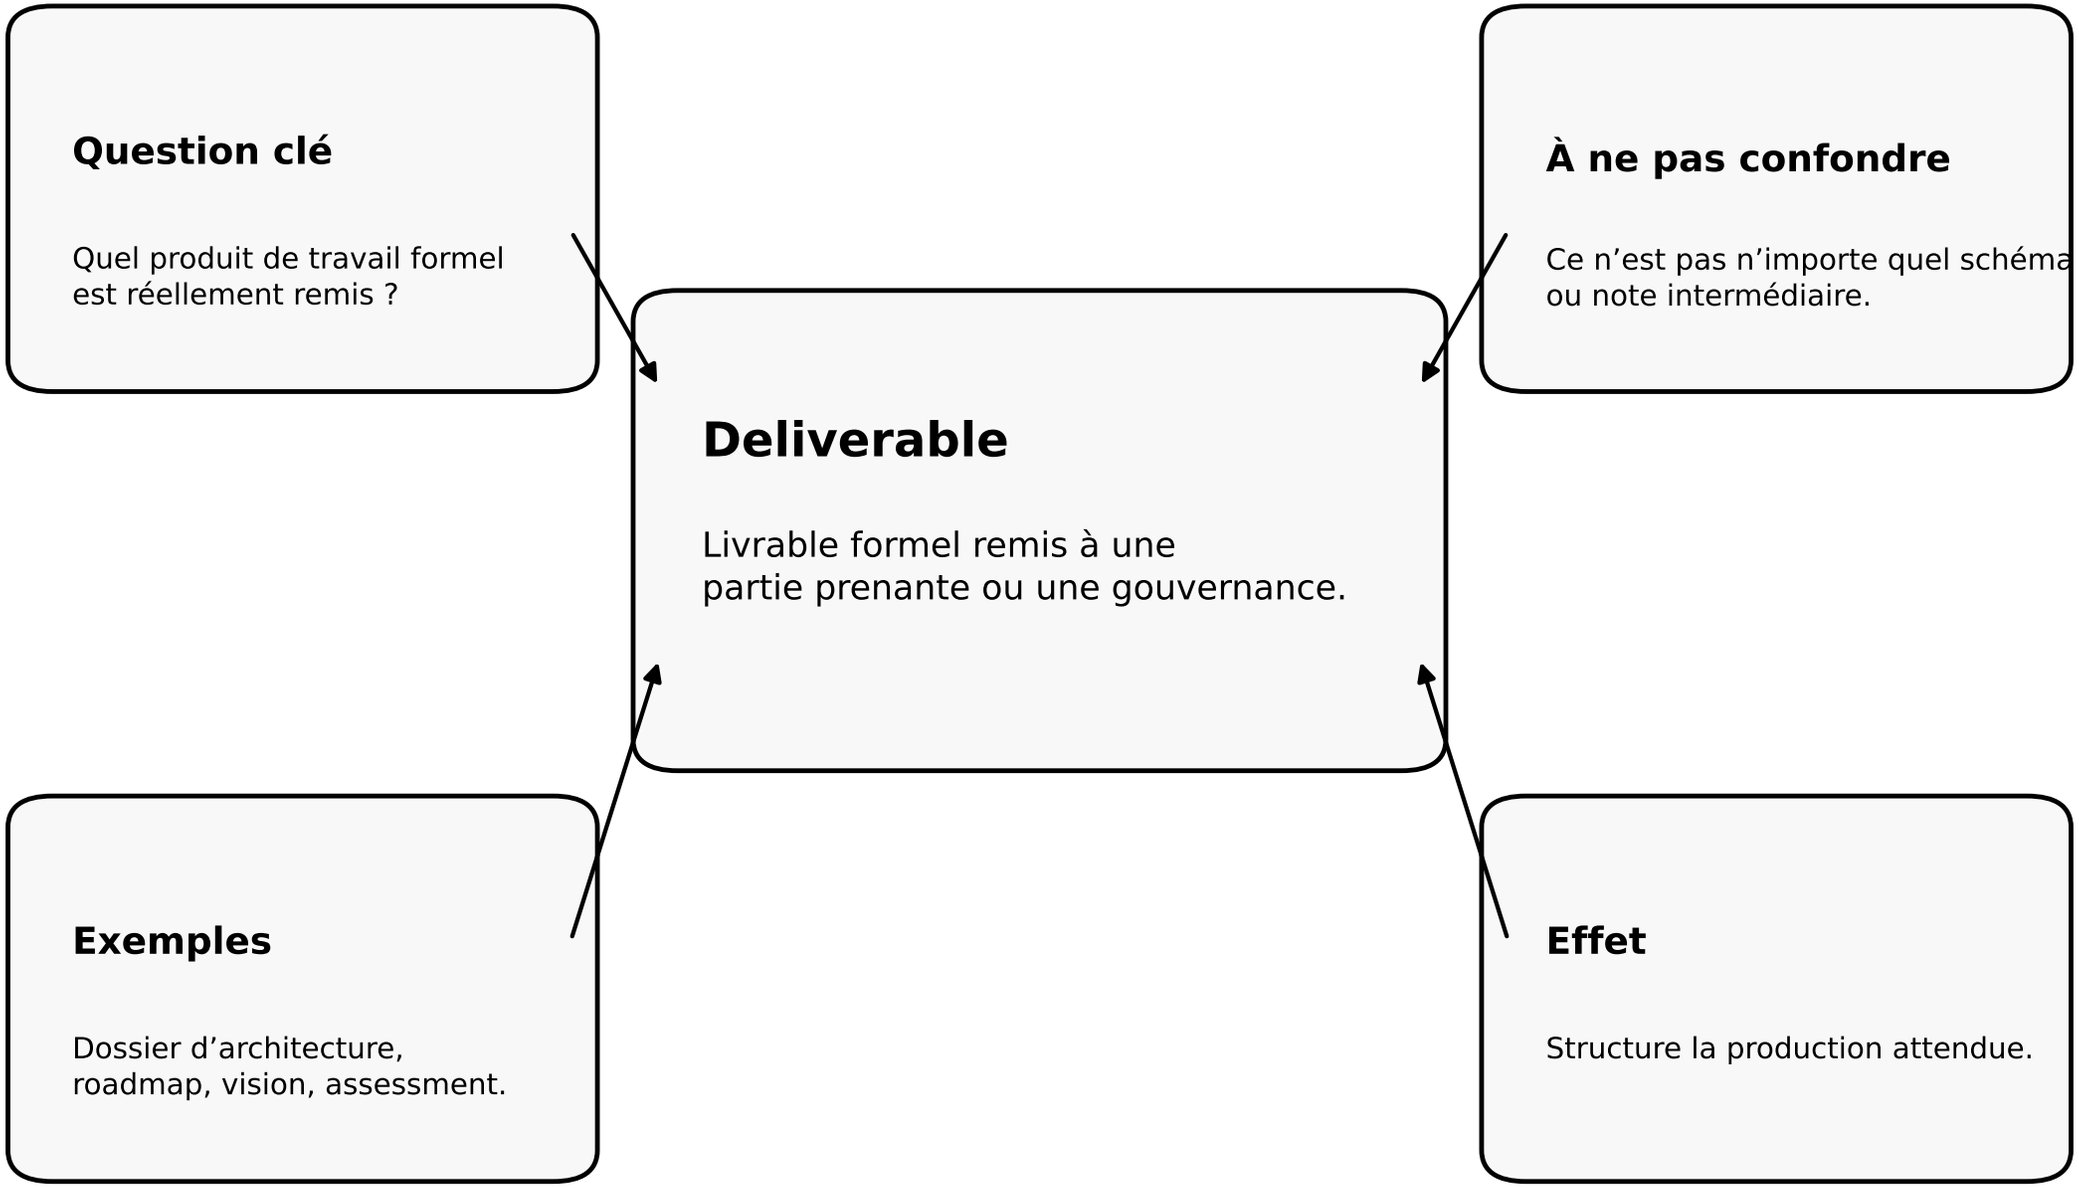

Architecture Governance

TOGAF Part 1 — schéma de révision

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Deliverable

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Artifact

Artifact

Élément descriptif d’architecture :
diagramme, matrice, catalogue, liste.

Question clé

Quel contenu décrit l’architecture ?

À ne pas confondre

Artifact ≠ deliverable.
L’un décrit, l’autre est remis.

Exemples

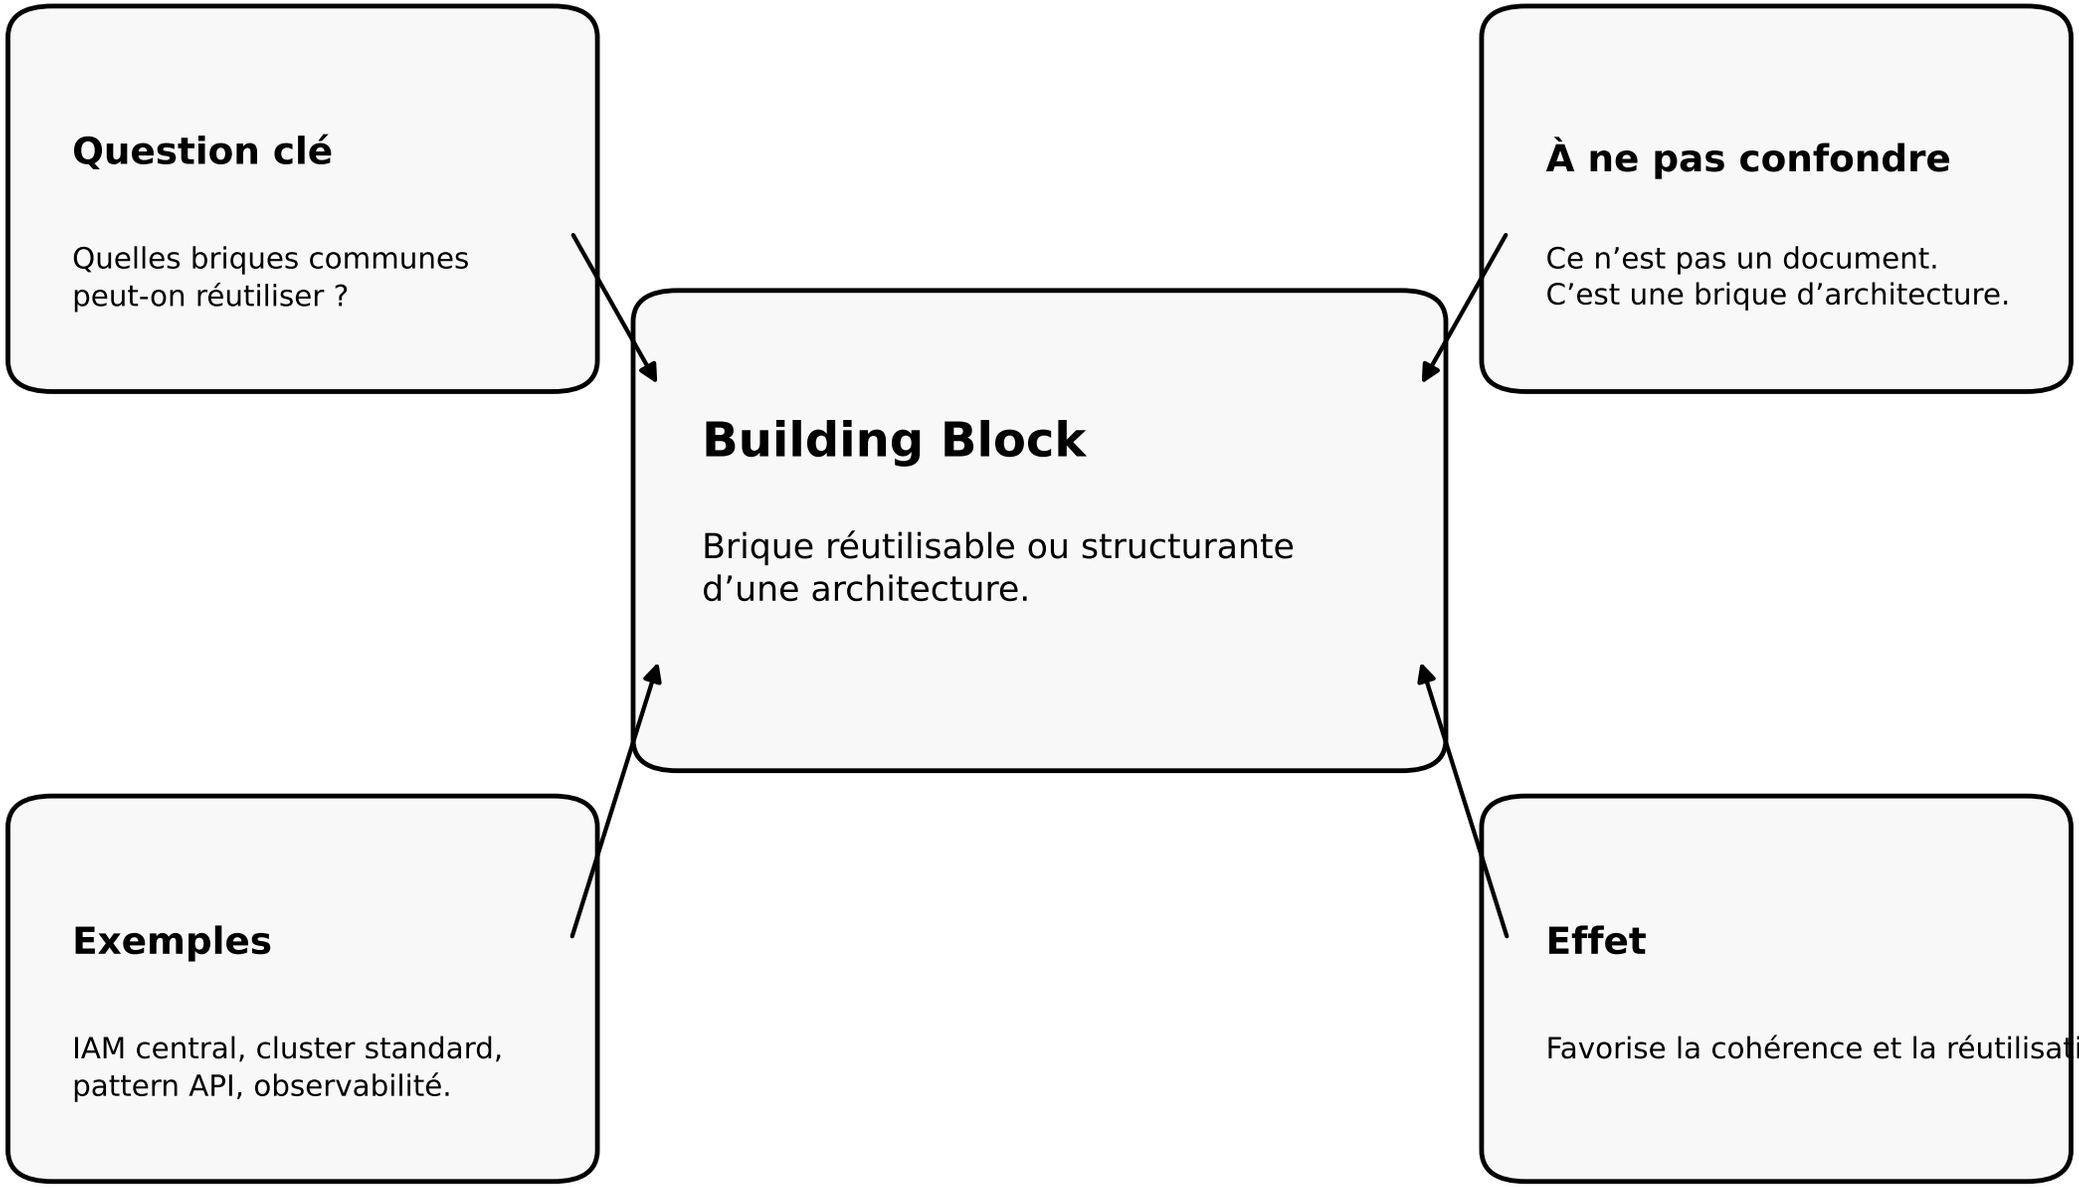

Matrice d’écarts,
diagramme cible, catalogue applicatif.

Effet

Donne la matière de l’analyse.

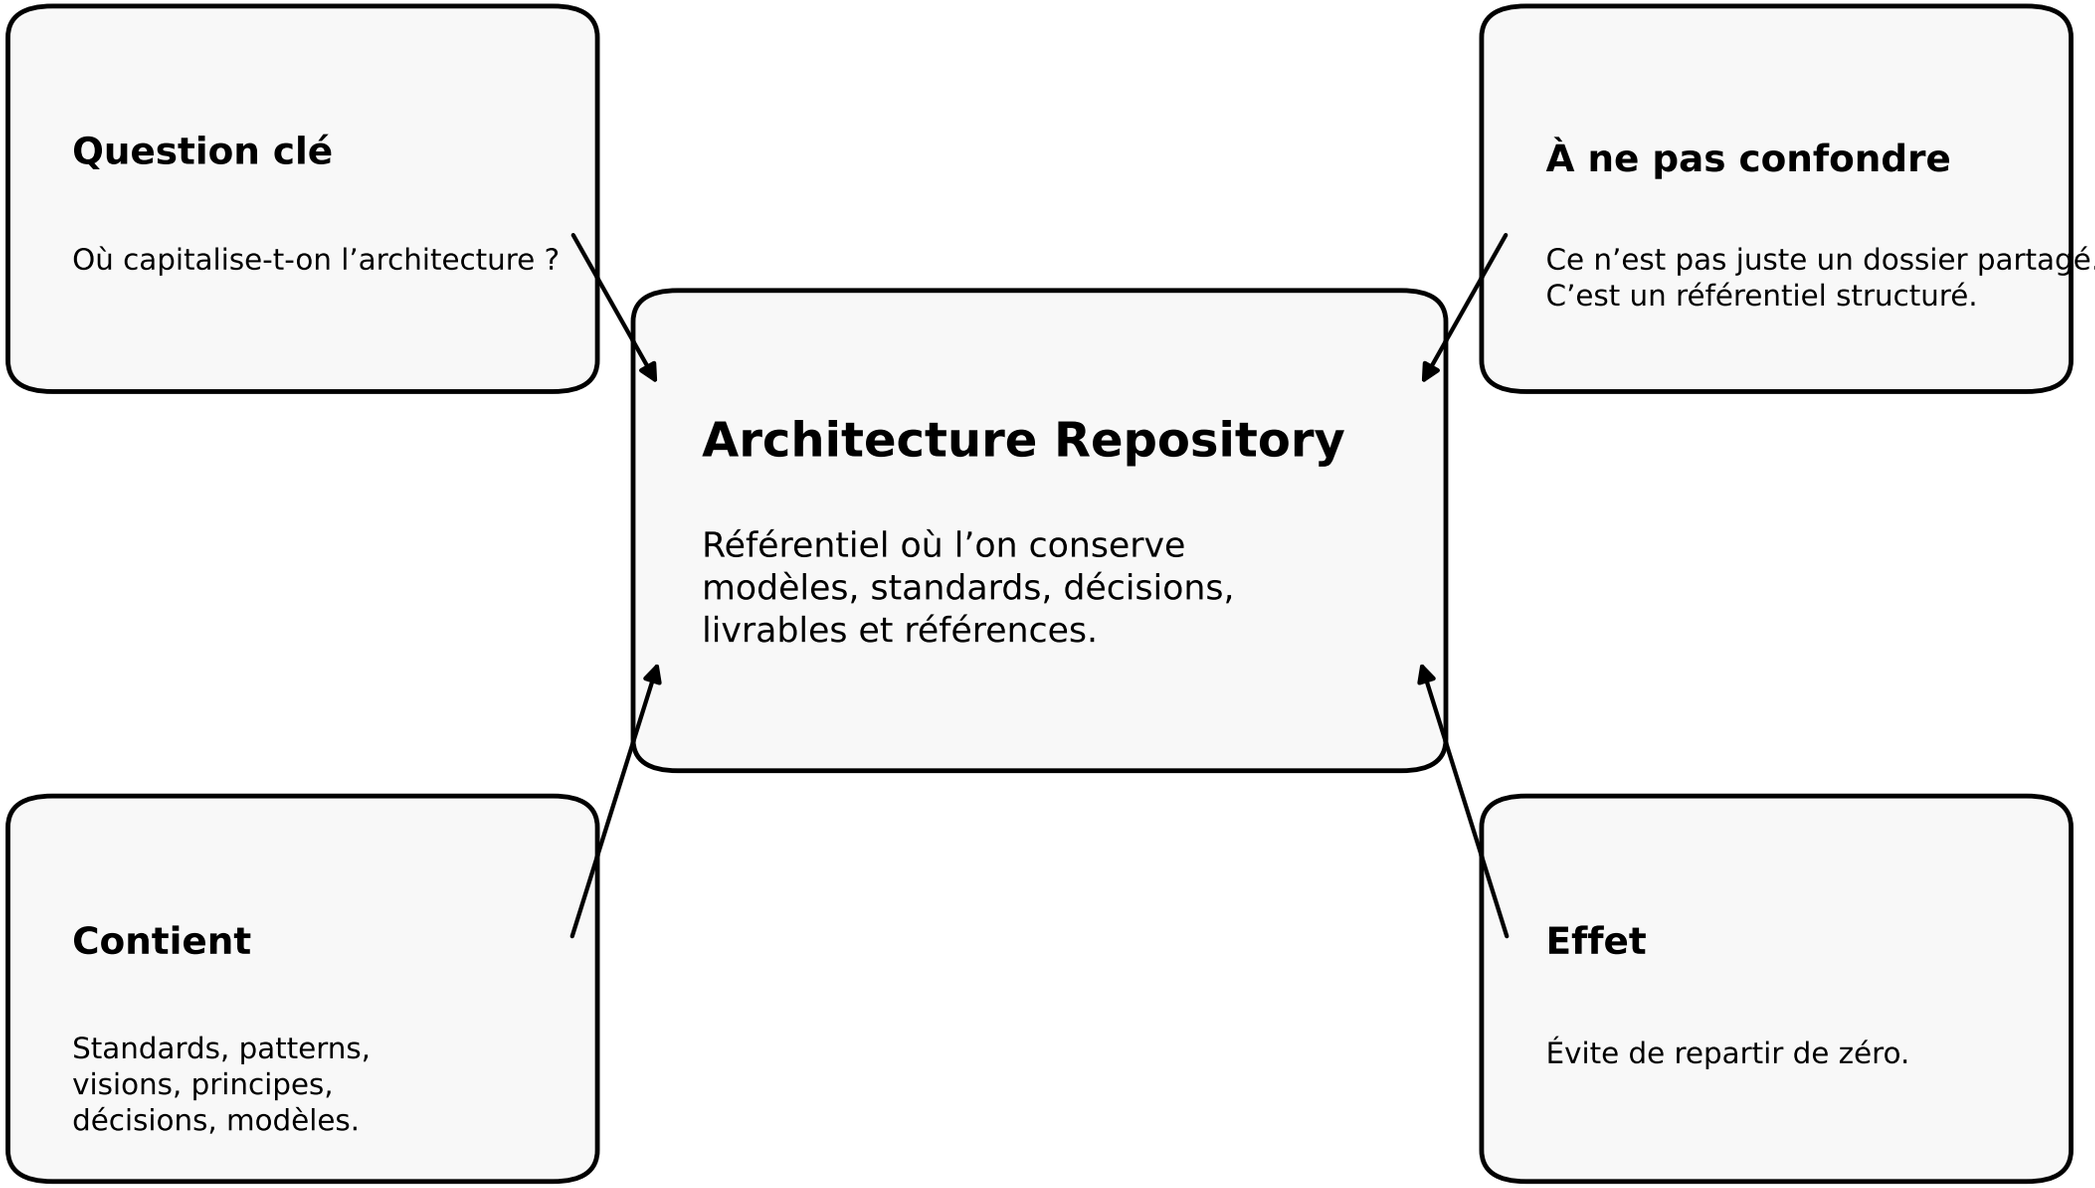

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

Building Block

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

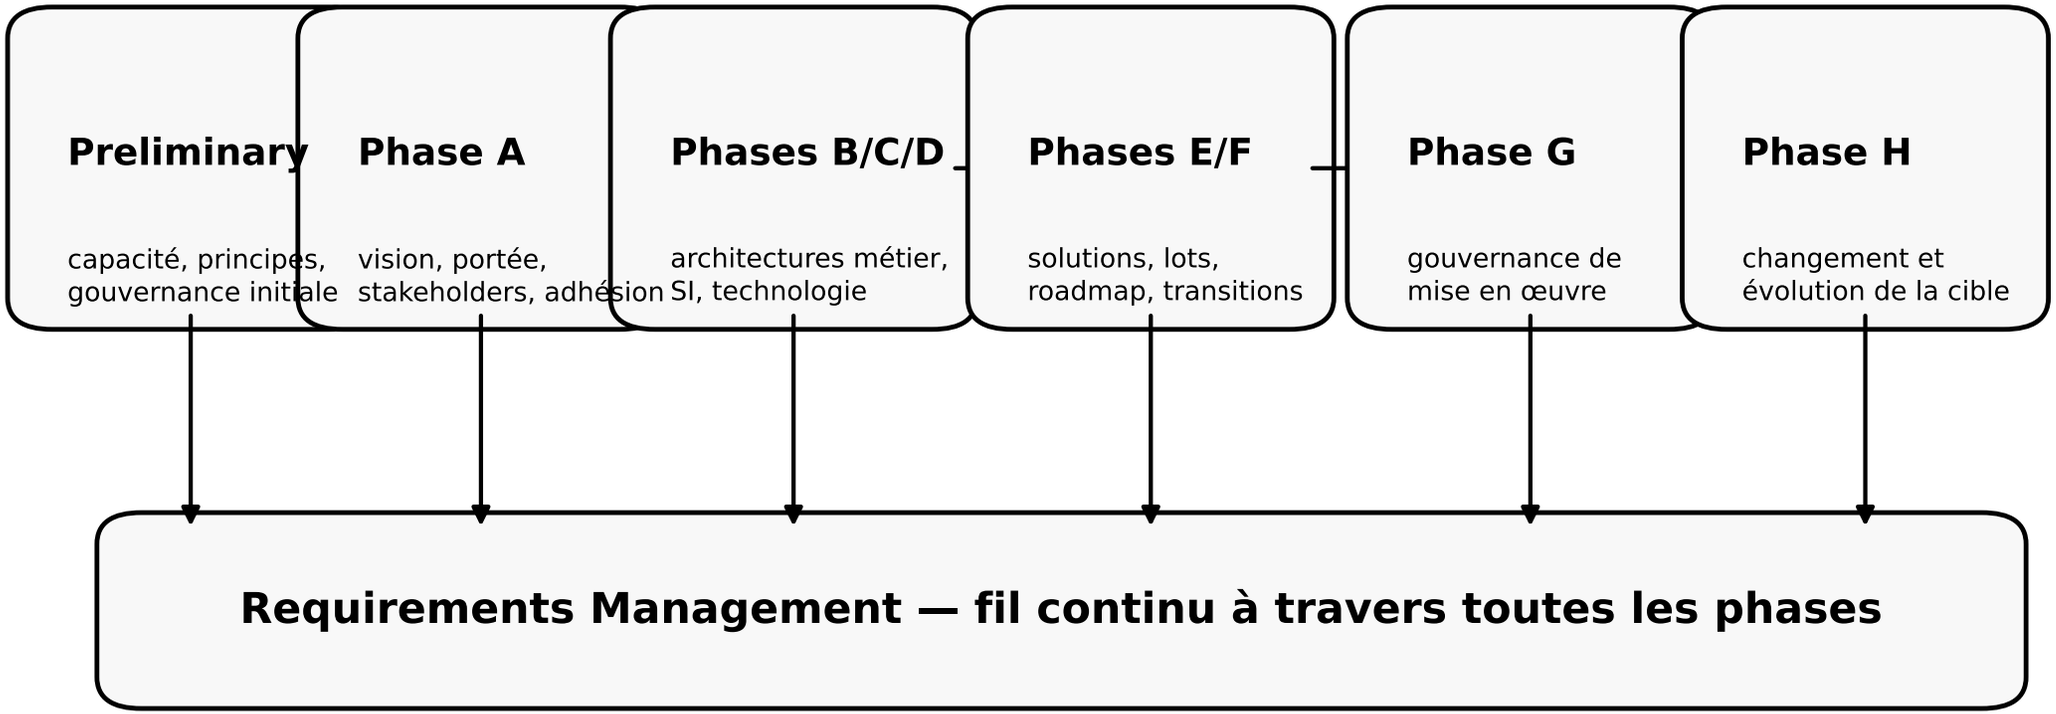

Architecture Repository

Lecture : centre = idée clé, autour = distinctions, usage, exemple, effet.

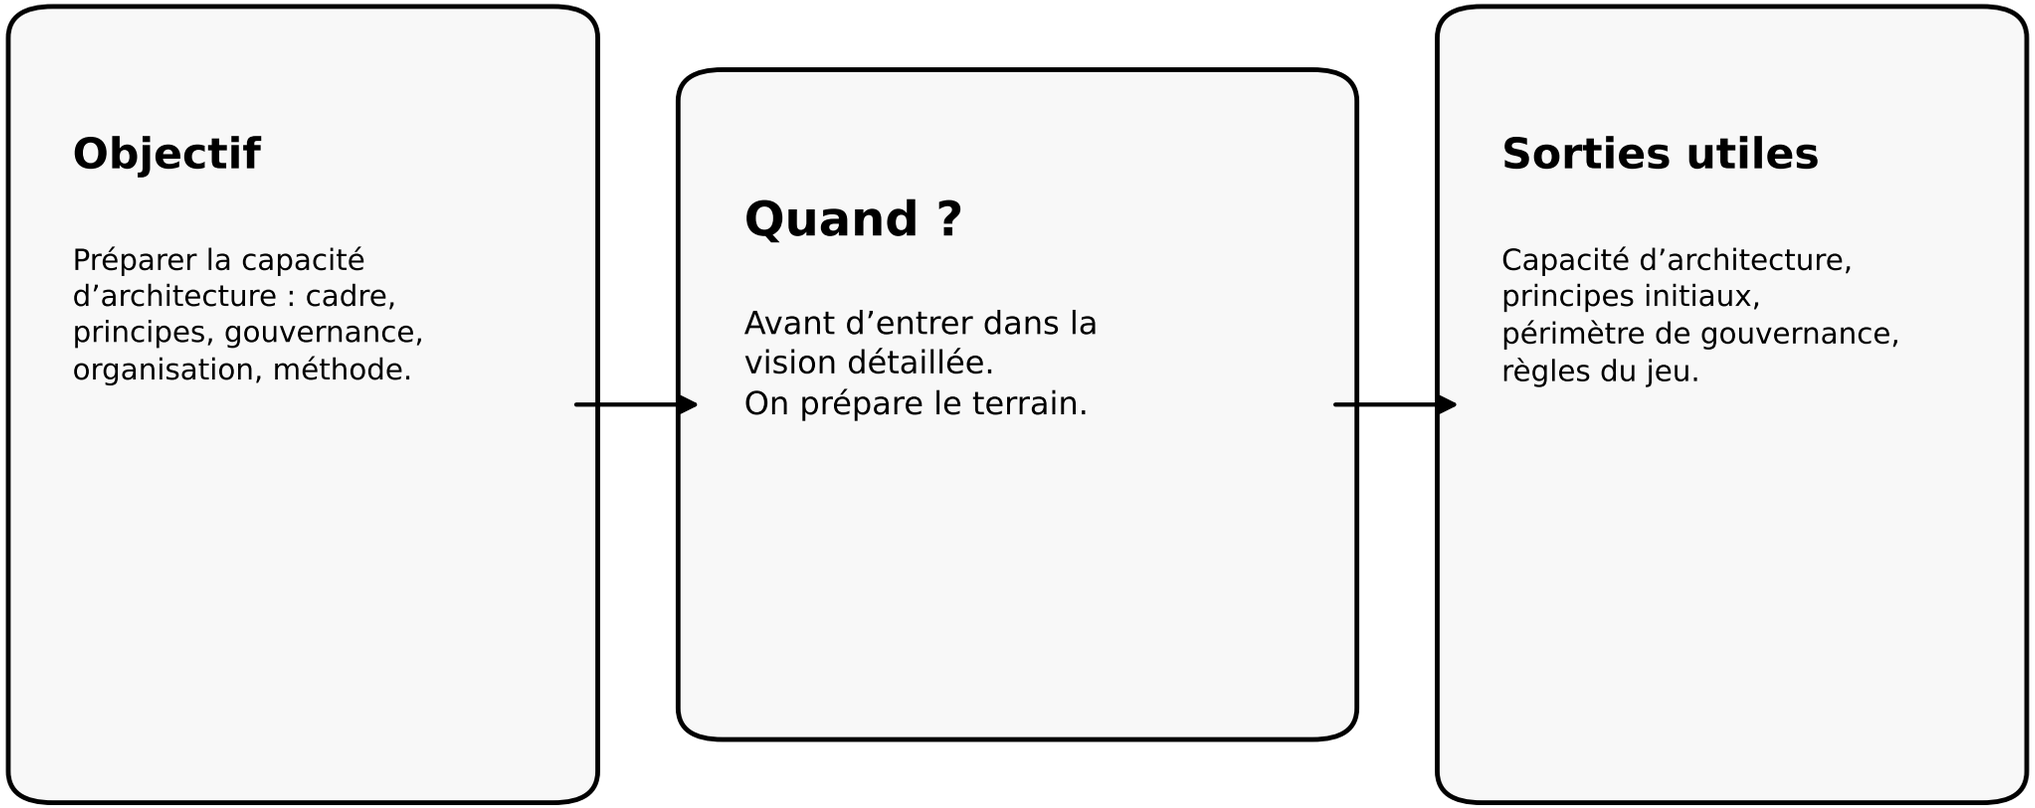

ADM — vue d’ensemble

Méthode TOGAF

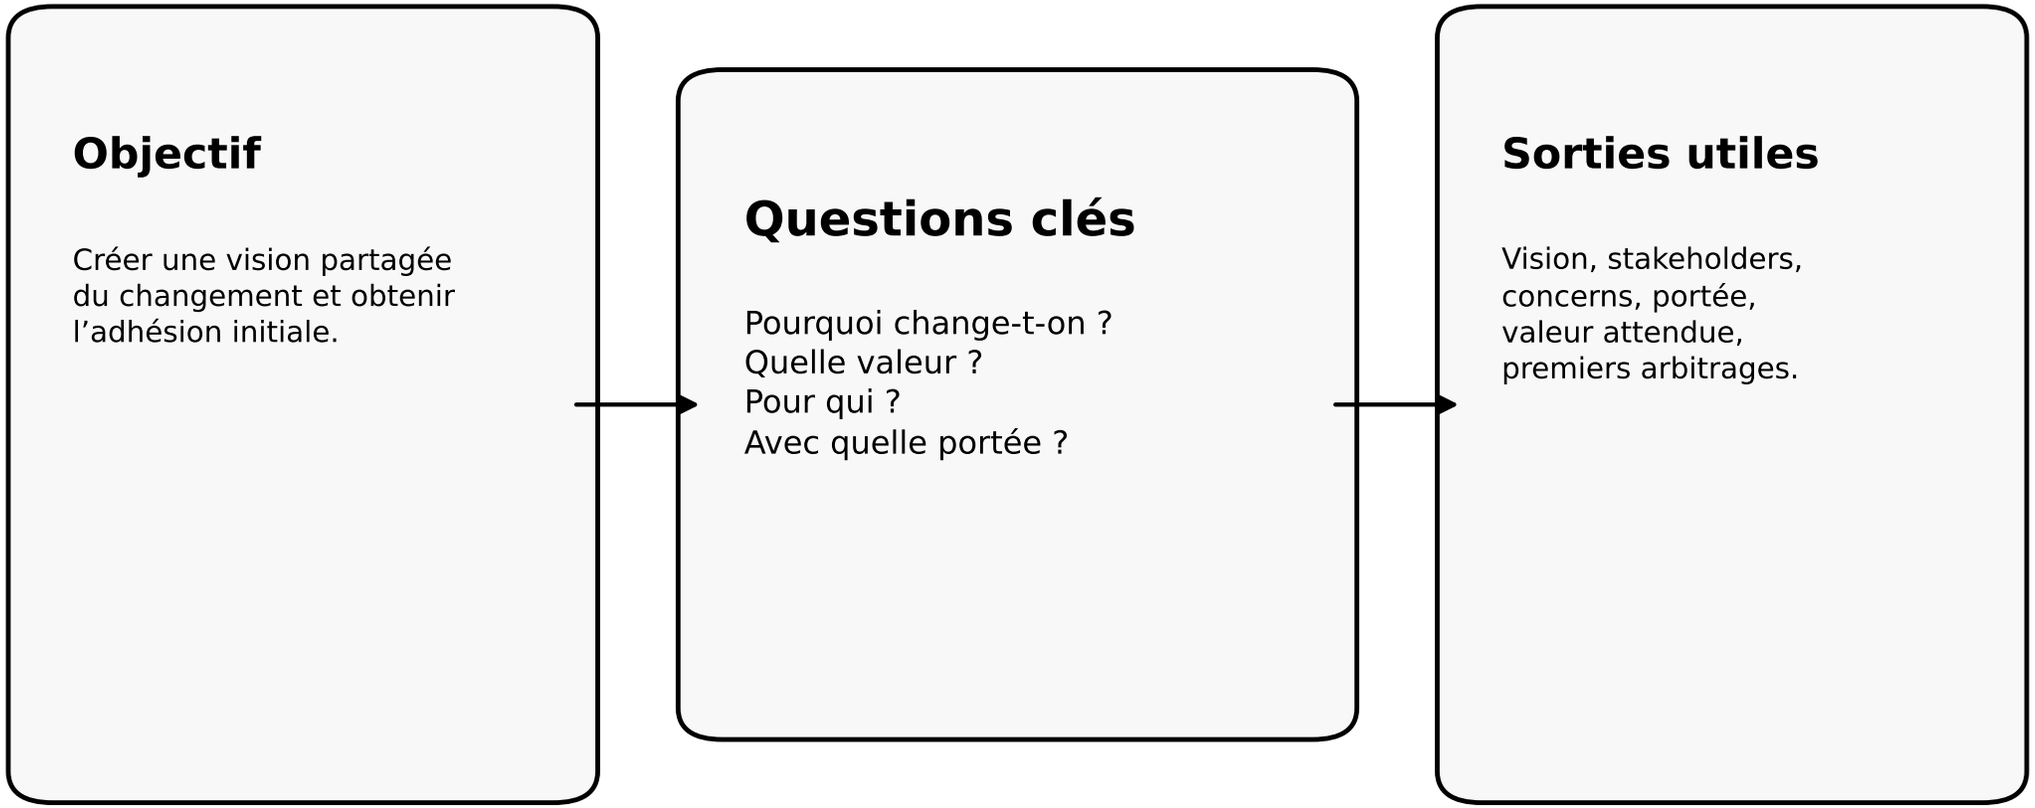

L’ADM est itératif, adaptable et piloté par le contexte : il ne se récite pas, il se calibre.

Preliminary

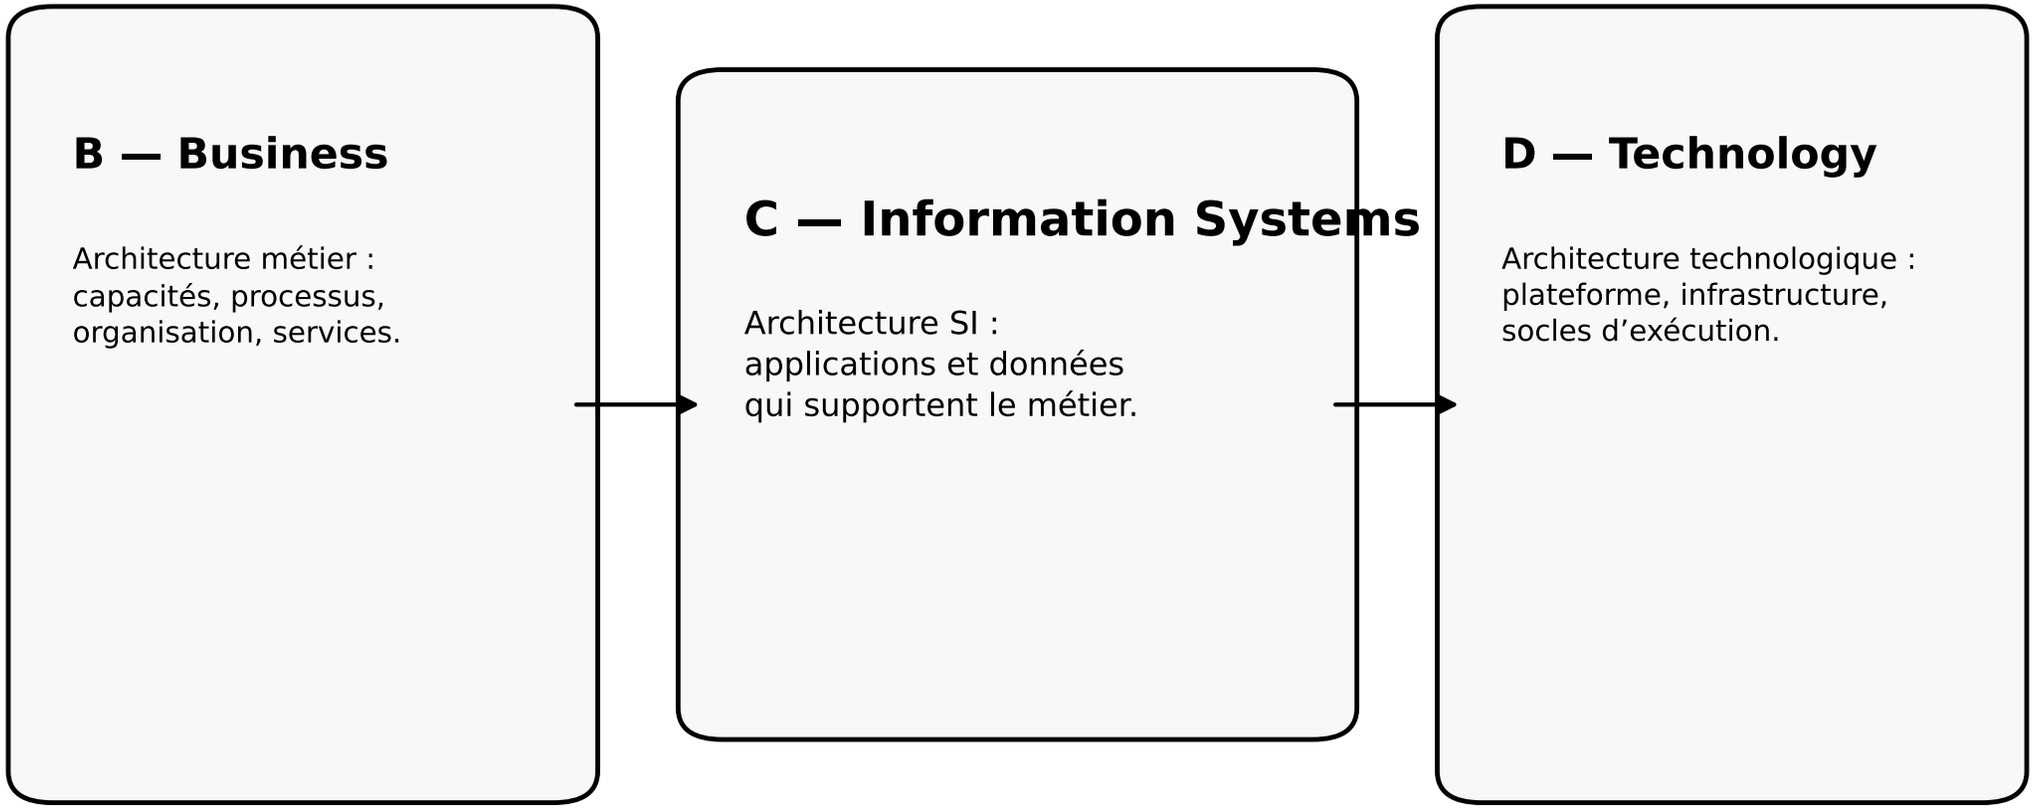

Idée simple : on prépare l’entreprise à architecturer sérieusement.

Phase A — Architecture Vision

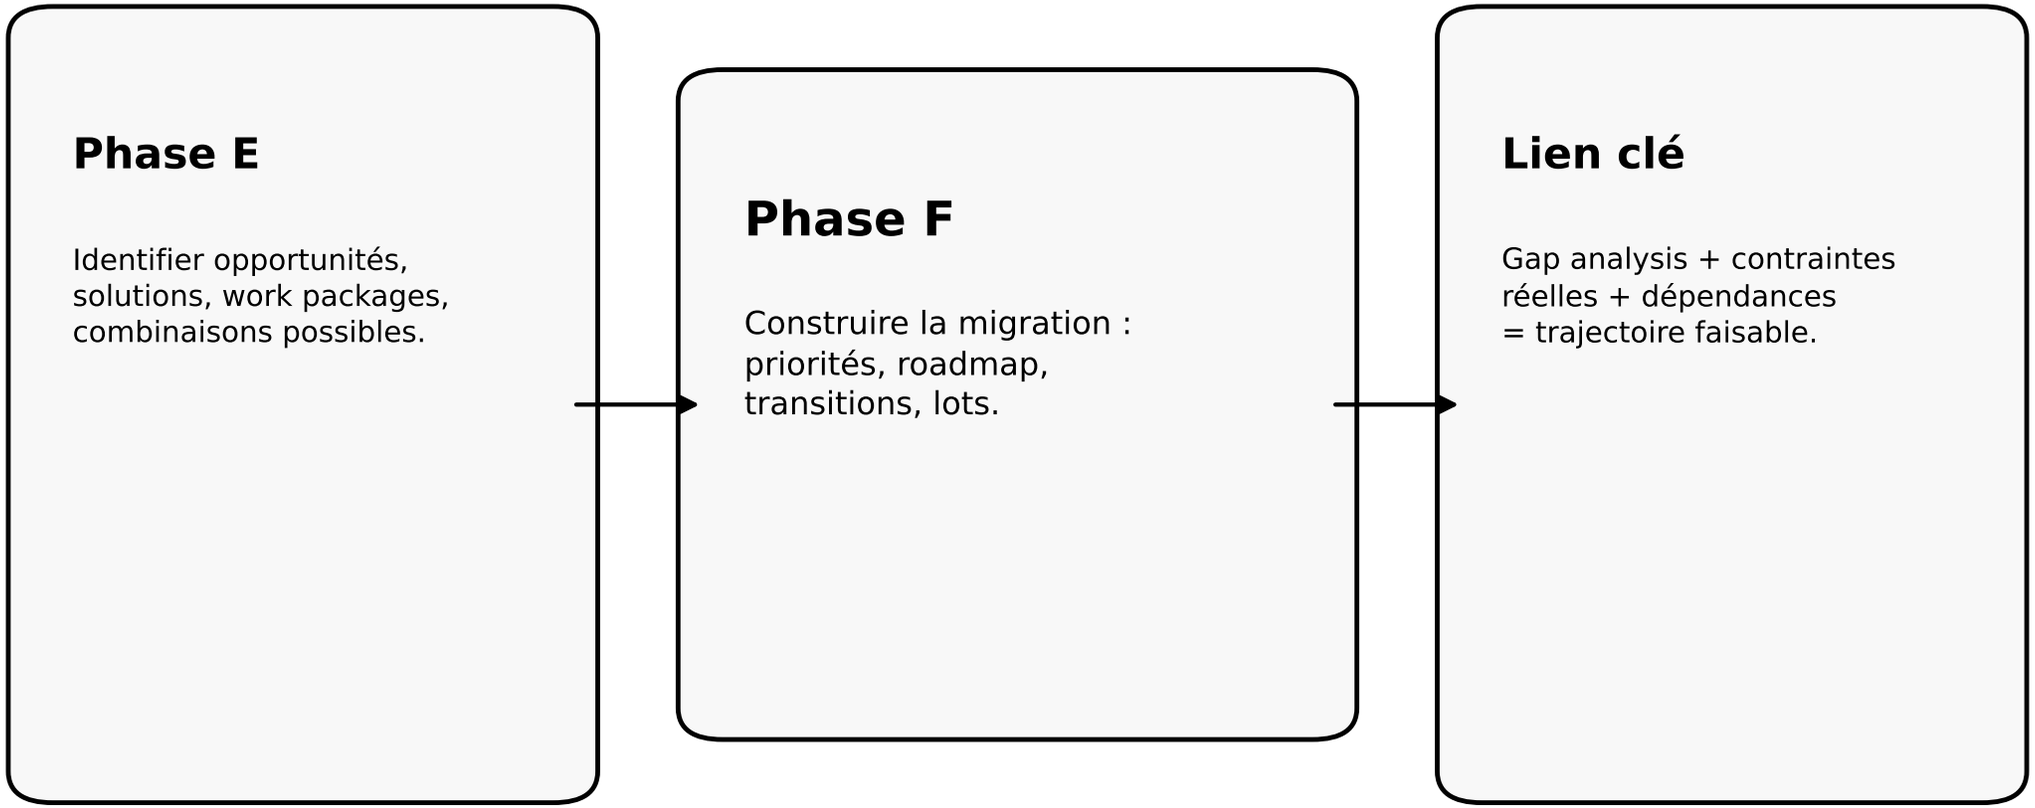

Idée simple : avant de détailler, on aligne le sens et les attentes.

Phases B, C, D

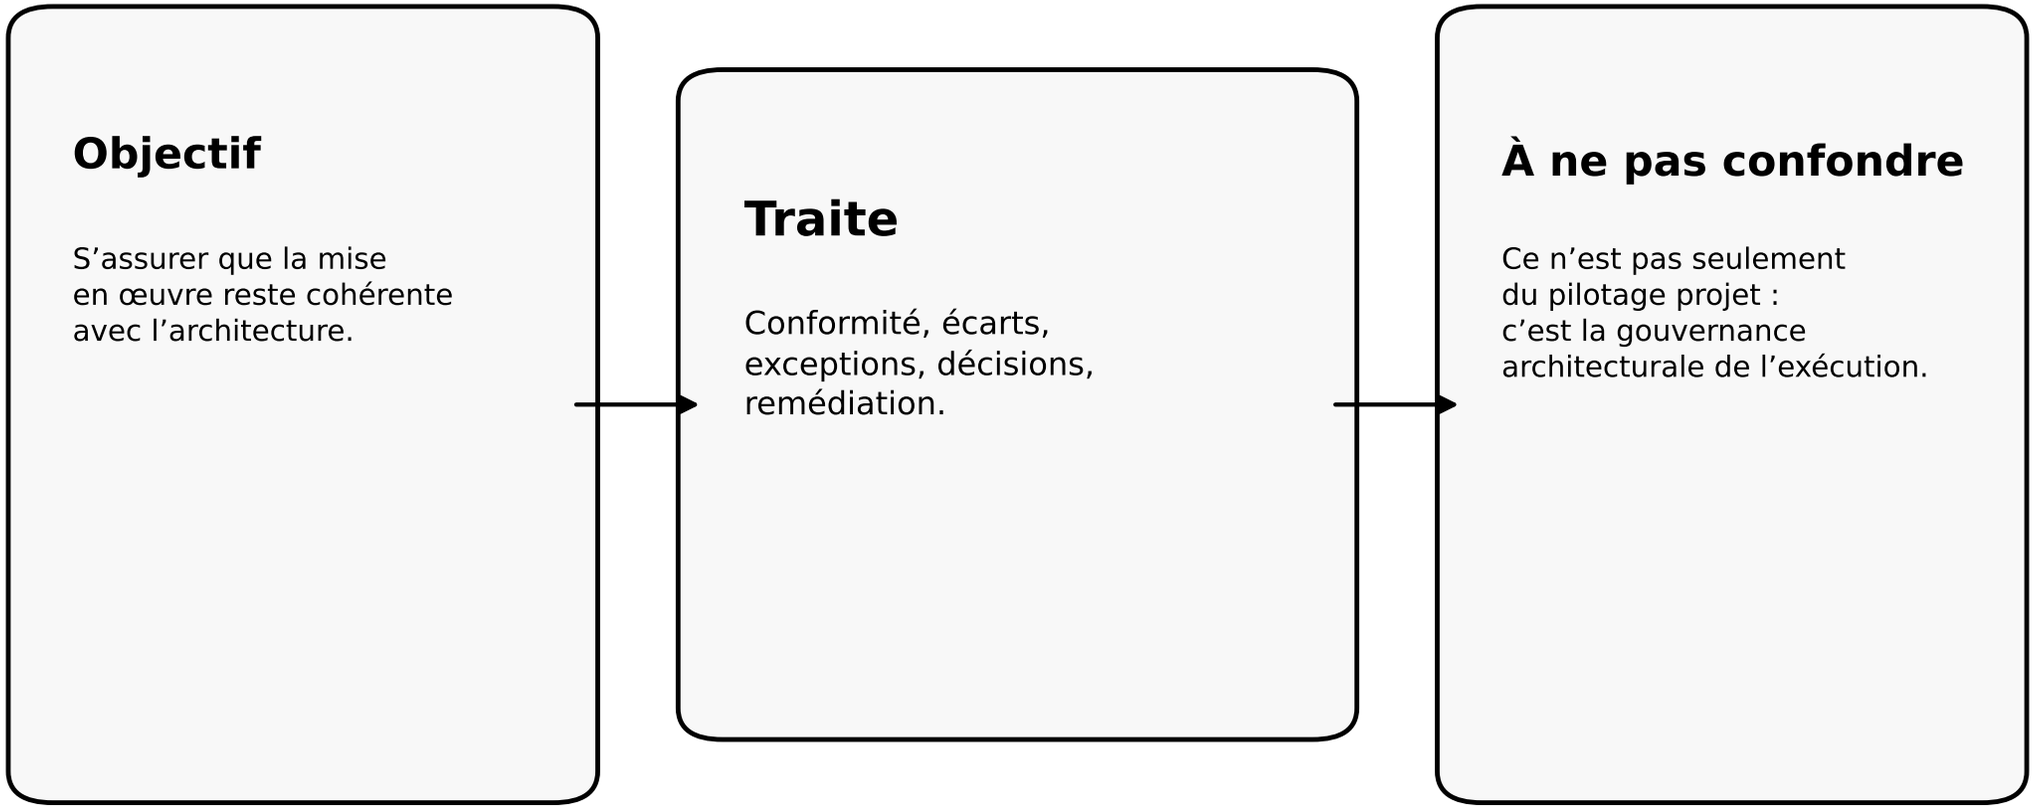

Idée simple : on décrit la cible par grandes couches complémentaires.

Phases E, F

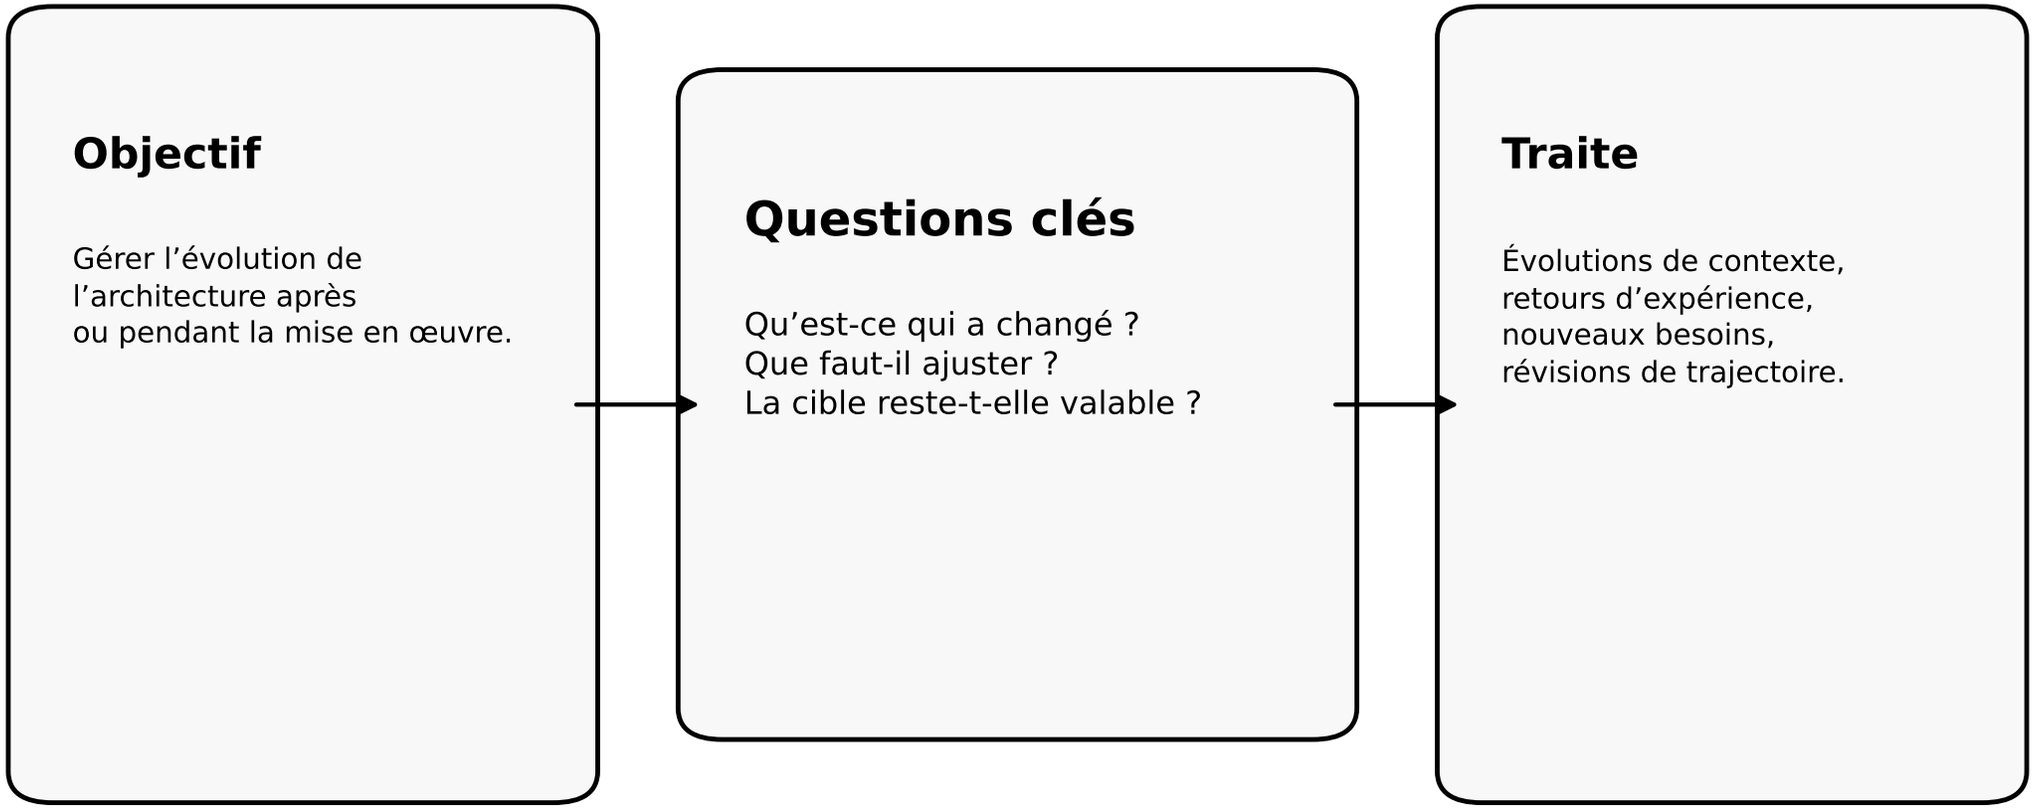

Idée simple : on transforme la cible en chemin praticable.

Phase G — Implementation Governance

Idée simple : on empêche la cible de se dissoudre pendant le delivery.

Phase H — Architecture Change Management

Idée simple : l’architecture reste vivante et s’adapte au réel.
